

Nurse Practitioners of Oregon

## Professional Practice Committee Report Sept. 27, 2024

The Professional Practice Committee has been focused on the creation and dissemination of current practice resources to NPO members with the goal of making NPO more relevant to our members and better meet their information needs. On the NPO website a section was created with Practice Resources on topics such as Psych Mental Health, Post COVID Conditions, and Telemedicine. Evaluation data indicates many members are not aware of these resources or the information may not be meeting their needs.

The committee is now evaluating how to best reach our members to find what practice issues are relevant to them and how they prefer to access information and resources. We want to know how the Professional Practice Committee can better meet your needs.

Please email [NPO@OregonRN.org](mailto:NPO@OregonRN.org) if you have suggestions, questions, or an interest in joining the committee.
