

**Course 3: Beyond Pain: Case Studies and Success Stories**

Instructor: Joseph Tatta, PT, DPT, CNS

Course Objectives:

1. Identify three evidence-based non-pharmacologic interventions for chronic pain
2. Develop a plan of care for three chronic pain syndromes
3. Use a systems biology and patient-centered approach in the treatment of chronic pain

**Course 4: Medical Spine Care: Treatment Based on the Use of The Pain Mechanism Classification System**

Instructors:

Peripheral Pain Mechanisms: Michael C. Geraci, Jr., MD, PT

Central Pain Mechanisms: Joe Lorenzetti, PT, DPT, MS, FAAOMPT, Cert. MDT, MTC

Couse Objectives:

1. Classify pain into one or more of the three peripheral and/or three central mechanisms in order to treat and not just manage pain
2. Identify specific treatment based on each of the three peripheral pain mechanisms
3. Identify specific treatment based on each of the three central pain mechanisms
4. Understand how using the Pain Mechanism Classification System reduces the use of not just opioids but all pain medications
5. Apply these principles in classifying pain to reduce the costs of spine care for medications, injections, surgery and imaging

**Course 5: How Chiropractic Can Assist with the Opioid Crisis**

Instructor: Gerald Stevens, DC, MS, MPH

Course Objectives:

1. Describe how chiropractic can assist with the opioid crisis
2. Describe what treatments chiropractors can do to help your patients with musculoskeletal pain
3. Discuss chiropractic myths, contraindications and risks
4. Discuss how different types of cases chiropractors can assist patients in an evidence based manner
5. Detail what the chiropractic profession is doing to assist with the opioid crisis
6. Facilitate an interactive forum to produce audience participation

- Attendees can choose one course per session
- Closing Speaker Presentation - 12:30 - 1PM

Please contact Cheryll Moore at [Cheryll.Moore@erie.gov](mailto:Cheryll.Moore@erie.gov) or at (716) 858-7695 with any questions.

## SESSION 1: 10 - 11AM

### Select one course:

**Course 1:** The Pain Pathway: How to Guide Your Patient Toward Conservative Care

**Course 2:** Role of Complementary and Alternative Therapies in the Management of the Opioid Epidemic

**Course 3:** Beyond Pain: Case Studies and Success Stories!

**Course 4:** Medical Spine Care: Treatment Based on the Use of the Pain Mechanism Classification System

**Course 5:** How Chiropractic Can Assist with the Opioid Crisis

## SESSION 2: 11:15 - 12:15PM

Choose one course from the selection above.

### COURSE INFORMATION:

**Course 1:** The Pain Pathway: How to Guide Your Patient Toward Conservative Care

**Instructor:** Marcia Spoto, PT, DC, OCS

### Course Objectives:

1. Describe the characteristics of a care pathway
2. Appreciate the role of a care pathway in managing select health conditions
3. Explain the impact of first-touch providers on patient outcomes and healthcare costs
4. Appreciate the importance of communication among members of a health care team

**Course 2:** Role of Complementary and Alternative Therapies in the Management of the Opioid Epidemic

**Instructor:** Teresa M. Miller, PT, PhD, GCFP

### Course Objectives:

1. Discuss alternatives to opioid use with their patients
2. Cite evidence for each of the alternatives
3. Analyze options available for treatment of pain and addiction
4. Compare accessibility, benefits, and obstacles to using various complementary and alternative therapies for different patients
