

NYSIR Risk Management presents a No Cost Virtual Seminar Series on

Integrating Generative AI in K-12 Education: Opportunities and Challenges Seminar

Join us as Oliver and Giuliano guide staff and educators through the practical aspects of Generative AI in education. Learn about AI's basics, its creative potential through text, audio, images, and video, and how it can enhance teaching and learning. We'll explore real-world applications, highlight the benefits for personalized learning and administrative efficiency, and discuss the potential risks and ethical considerations. This presentation aims to show how Generative AI can be a tool for educators, not a replacement, providing innovative ways to engage students and streamline tasks. Discover how to navigate the future of education with AI, addressing both the exciting opportunities and the challenges ahead.

Who Should Attend: District Administration, Building Administrators, School Business Leaders, IT Leaders and Staff, Directors of Facilities, STEM Educators and others who use or manage AI in the district/BOCES.

Webinar Presenters: Oliver Page, Chief Executive Officer of CyberNut and Giuliano Morse, Senior AI Researcher and Advisor to CyberNut
