Program Growth

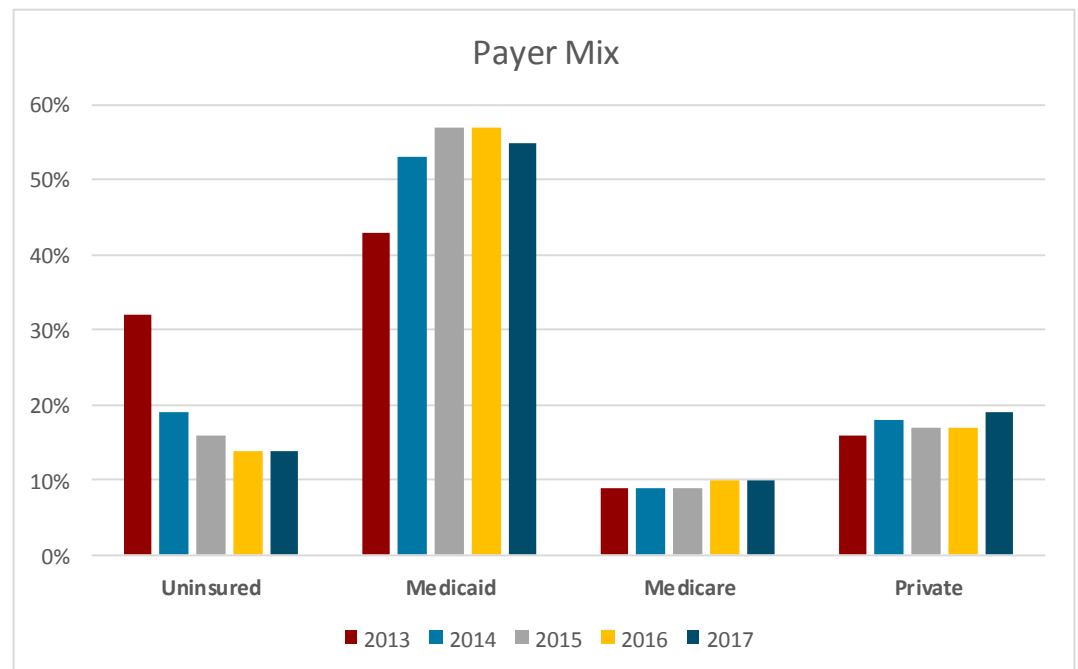

2014-2017

30% Increase in Patients

**63% Increase in Staff/
Health Center Jobs**

47% Increase in Sites

Data from 2017 UDS and health center self-reporting methods.

Community Health Centers provide comprehensive person-centered preventive and primary care that reaches beyond the traditional scope to include in-demand services such as dental, mental health, substance abuse disorder treatment, vision, and pharmacy services. Under the leadership of consumer-led boards, they tailor their programs and services to meet the unique clinical and cultural needs of those they serve. www.ohiochc.org
