

HCCN Project Goals

A1. Increase the percentage of Participating Health Centers with an ONC-Certified EMR system in use to 100%.

Activity 1.	Leverage the networks purchasing power to obtain cost savings on ONC-Certified EHR Systems
Activity 2.	Provide virtual technical assistance to help Participating Health Centers implement newly purchased EHR, including staff training
Activity 3.	Assist Participating Health Centers with obtaining and maintaining broadband connectivity necessary to support meaningful use of HIT

A2. Increase the percentage of Meaningful Use eligible providers at Participating health centers receiving incentive

Activity 1.	Leverage the existing eligible providers within the network who are not yet eligible, recruiting mentors who will work with non-eligible providers throughout the process.
Activity 2.	Leverage available resources to support workflow redesigns which align with MU requirements
Activity 3.	Assist eligible providers at Participating Health Centers in completing required attestation documentation for the CMS EHR Incentive Program
Activity 4.	Support Participating Health Centers in making patient portals easier to use and making modifications where possible.

B1. Increase the percentage of Participating health centers that electronically extract data from an EHR to report all UDS

Activity 1.	Support Participating Health Centers' analysis of their data collection, management, analysis and reporting processes
Activity 2.	Support integrating health IT data essential to Participating Health Centers caring for safety-net populations (registries, quality measures, UDS reporting)

B2. Increase the percentage of Participating Health Centers generating quality improvement reports at the site and

Activity 1.	Support health IT system customization to address the unique needs of the Participating Health Centers through data collection template design
Activity 2.	Train Participating Health Center staff to develop and utilize QI reports
Activity 3.	Train Individual Sites to improve use of systems for data analysis at the site and at clinical team level

B3. Increase the percentage of Participating Health Centers that integrate data from different service types and or

Activity 1.	Support integration of clinical information from diverse health care services (e.g. BH, Oral Health) by facilitating the customization of Participating Health Centers EHR systems
Activity 2.	Coordinate data migration and abstraction training

C1. Increase the percentage of Participating Health Centers that improve care coordination through health information

Activity 1.	Support connecting more centers to the Ohio Health Information Exchanges (Clinisync and Health Bridge)
Activity 2.	Support HIE infrastructure development to improve care coordination including electronic labs, ePrescribing, immunization registries and surveillance data reporting

C2. Increase the percentage of Participating Health Centers using health information exchange to support population

Activity 1.	Support planning and facilitation for Participating Health Centers in deploying HIE in public health reporting.
Activity 2.	Support Participating Health Centers in using health information from various care settings to improve population health management activities

D1 Increase the percentage of Participating Health Centers that meet or exceed Health People 2020 goals on at least five

Activity 1.	Support Participating Health Centers in developing data collection and reporting processes that foster real-time use of clinical data
Activity 2.	Train Participating Health Centers to integrate data from EHR and other Health IT systems to improve quality and manage

D2 Increase the percentage of Participating Health Centers that improved the value, efficiency and or effectiveness of

Activity 1.	Support Participating Health Centers in integrating data from health IT systems into business policies, procedures , and decision-making.
Activity 2.	Support Participating Health Centers in developing strategies to manage costs and increase efficiency using health IT
Activity 3.	Planning and facilitation for development of dashboards and other means for the organization to quickly identify opportunities for improvement and efficiency

D3 Increase the percentage of Participating Health Centers sites that have current PCMH recognition

Activity 1.	Support Participating Health Centers' provision of self-care support and community resources through health IT systems
Activity 2.	Support Participating Health Centers use of health IT systems culturally and linguistically appropriate services.
Activity 3.	Assist Participating Health Centers to obtain recognition or accreditation as PCMH or renew recognition of accreditation if expiring.
