Dear Interested Party:

The Wayne National Forest has recently enlisted the help of a neutral third party on steps we might take to improve relationships with a broad range of our neighbors including private landowners, communities, citizen interest groups and other governmental entities. At the same time, we are also taking a fresh and broad look at what habitat improvements are needed forest-wide and what the priorities and sequence might be for those needs.

To focus on these important efforts, I have decided to not move forward with the Buckeye Habitat Improvement Project and will remove the project from the Schedule of Proposed Actions (SOPA). I very much appreciate the input you have given on the Buckeye project to date and hope to re-engage with you in the future.

Sincerely,

TIMOTHY SLONE
Ironton District Ranger
