

Francisco Alvarez, MD, FAAP

Dr. Alvarez is the Associate Chief of the Regional Pediatric Hospital Medicine (PHM) Programs and Clinical Professor of Pediatrics at Stanford School of Medicine in Stanford, CA. Previous to his current role, he was director of the Children's National Health System (CNHS) Community Hospital Services at Children's National Medical Center in Washington, DC. He has held several national leadership roles, such as chair of the AAP Committee of Guideline Development, chair of the Consortium of Pediatric Hospital Medicine (CPHM), co-chair of the Academic Pediatric Association (APA) PHM Special Interest Group (SIG), co-chair of the APA PHM Leadership SIG, and co-chair of the PHM Conference Planning Committee. He has been involved in various projects on how to best address quality and safety gaps within settings that care for pediatric populations, such as the most recent PHM Choosing Wisely and PHM Core Competencies. He has been a contributor and past editor of the AAP Evidence-Based Clinical Practice Guidelines (CPG) Development and Implementation Manual. Some of his work has been published and presented at the Pediatric Hospital Medicine, Society of Hospital Medicine, and Pediatric Academic Societies conferences. Personal interests include ways to improve pediatric quality and safety within adult settings, leadership skills development education, and the role of pediatric tertiary centers in improving pediatric health within their surrounding regions through public and private affiliations.
