INTERNATIONAL SYMPOSIUM ON
FLUORESCIN ANGIOGRAPHY

Tokyo, Japan will play host to an International Symposium on Fluorescein Angiography from February 2 through February 4, 1972. The advanced notices make this meeting appear to have great promise to be a good one for the OPS member to attend.

As of this writing, it is known that two of our more distinguished members, Mr. Lee Allen and Mr. Johnny Justice, Jr. will be presenting technical papers. Mr. Allen will discuss "Broad Band Interference Filters for both color and Black and White Fluorescein Angiography of the Ocular Fundus", and Mr. Justice will speak on "The Basic Techniques of Fundus Photography and Fluorescein Angiography".

Dr. Koichi Shimizu, the Secretary of the International Symposium reports that Mr. Kanagami is hopeful in having an active Chapter of the OPS in Japan by the time the meeting takes place. That is wonderful news.

For additional information regards this meeting, please contact:

Koichi Shimizu, M.D.
General Secretary
Department of Ophthalmology
University of Tokyo School of Med.
Hongo, Tokyo, 113, Japan.

CHAPTER NEWS

As was urged in the previous Newsletter, c device which will make it worthwhile for the majority of our members to remain in

the OPS is the formation of regional Chapters. Thus far, only a small percentage of our total membership has been able to attend the Annual OPS Meetings, and this proves to be the same group of people. As time passes, however, it is hoped that the OPS will become an internationally known and recognized Society. Then, perhaps more and more members will be sponsored to the meetings.

In the meantime, however, it is the non-attending member who demonstrates the greater enthusiasm and loyalty to the Society. This is proven by his continued membership in spite of the fact that he has not yet received anything tangible for his money.

Therefore, it behooves all of us who are able to attend the meetings to take active part in the formation of chapters, to report the activities of the Annual Meetings to the others.

It is with pleasure that I report the first announced attempt at the organization of a regional chapter from Mr. Thomas Van Cader of the University of Louisville, Kentucky and Mr. Kenneth Juian of the Indiana University. Lots of luck, Tom and Ken!

Mr. Johnny Justice is also organizing an OPS Chapter in the Dallas, Texas area. He will be coordinating Chapter activities with the Pan American Ophthalmological Society Meeting scheduled to take place in Dallas sometime in April.

OPS ANNUAL MEETING, 1972

The 3rd Annual Meeting of the OPS will be held in Dallas, Texas during September, 1972.
In addition to the technical courses such as those offered through the Academy this year by Lee Allen and Johnny Justice ("Ophthalmic Photography"), Doctors Cass and Maumenee, and Johnny Justice ("Fluorescein Angiography in the Diagnosis and Treatment of Diseases involving the Macula"), and Doctors Braley and Watzke, and Lee Allen ("Fundus Lesions") it is hoped that the OPS can schedule technical workshops prepared and conducted by ophthalmic photographers for ophthalmic photographers.

Mr. Ogden Frazier, our current Vice-President is also Program Chairman. Please contact him if you wish to present a paper, or with suggestions for programming. His address is:

Mr. Ogden Frazier  
Department of Ophthalmology  
University Hospitals  
University of Iowa  
Iowa City, Iowa 52240

TRY TO ATTEND: More literature is planned for you later, in our June mailing.

NEWS OF OUR MEMBERS

Roger Lancaster has accepted a great, new post with the Retina Associates in Boston. He is leaving the Massachusetts Eye and Ear Infirmary, where he was the Chief Medical Photographer. Congratulations and lots of luck to a great guy.

Muriel Laban, of New York City, has changed positions, leaving the Mt. Sinai School of Medicine's Department of Ophthalmology to join the photo unit of Flower Fifth Avenue Hospital as one of their ophthalmic photographers. Lots of luck to a great gal.

Don Wong, your current Society Secretary and Newsletter Editor, is also leaving Mt. Sinai School of Medicine's Department of Ophthalmology, after a five-year stay, to take over the Ophthalmic photo unit of the Flower Fifth Avenue Hospital. (Lots of luck, me). Please address your correspondence to me at:

Department of Ophthalmology  
New York Medical College  
Flower and Fifth Avenue Hospitals  
Fifth Avenue and 106th Street  
New York, New York 10029

Tom Merrill takes over the position as Chief Ophthalmic Photographer at Mt. Sinai School of Medicine, to be joined by a newcomer to our field, Bob Schaffel. Good luck, guys.

Eleanor Maurer will be leaving the Medical Photo Department of the Massachusetts Eye and Ear Infirmary to join Johnny Justice at the Baylor Medical College at the beginning of the year.

(See what you started, Mr. Justice?)

Lee Allen, in addition to his travels to Japan, will also be presenting an exhibit on Fluorescein Angiography at the Oregon Academy of Ophthalmology in March, 1972. Busy fella, Lee Allen!

Tom Van Cader, in addition to Lee Allen, is the only one who wrote me to date with news and suggestions. Let me quote something from Tom's letter, which I wish you (all) would consider:

"One feature of your Newsletter struck my fancy, and then at the same time let me down. You mentioned four Fundus Photography Workshops, two already held and the other two without any dates printed as to when. How about a column in each paper listing meetings and other workshops across the country that may be of interest to the members? This will be hard information to get, I agree, but with a few strategically placed ears (members) around the country keeping lookout for interesting meetings, you could be kept informed."

Smart man, this Van Cader! If no one has interest to write me with information, how can I get it to you all?
Mr. Johnny Justice has been appointed Contributing Editor in Ophthalmology of the biological Photographic Association's (BPA) journal. Congratulations, to a very busy fellow.
