On June 4, 1982, Roger C. Lancaster, F.O.P.S., passed away. Most of the OPS membership remember Roger from the earlier days when the Ophthalmic Photographers' Society was just forming. He was very active in several areas of filter experimentation and as a founding OPS member.

An Ophthalmic Photographer for over 20 years, Roger is the first Fellow of the Society who has died. Up until his death, Roger was working in the Washington, D.C. area with Ophthalmic Photographic Consultants and Services. He was 42 years old.

As Editor of the OPS Newsletter, I wish to express our deepest sympathy to his family. His warm smile and enthusiasm for quality ophthalmic photography will certainly be remembered by many of us.

**************

ENCLOSURES: 1. CALL FOR PHOTOGRAPHS-1982 EXHIBIT ENTRY FORM.

2. PROPOSED BY-LAWS TO BE VOTED ON IN COMING ELECTION.

3. CALL FOR PAPERS FOR 1982 ANNUAL OPS MEETING IN SAN FRANCISCO.
AGED FILM RECEIVES AWARD by Lindsey Moore

A revolutionary special effect process which creates simultaneous, duo images was used to film EXTRACAP/IN THE BAG; MANUAL PROCEDURES* the winner of the ophthalmology division of the John Muir Medical Film Festival. Produced by Thomas Ager, medical cinematographer, Bellevue, Washington, this narrated, 20-minute videotape was edited from many hours of tape made during eye surgery performed by David J. McIntyre, M.D.. Dr. McIntyre is an international authority in the field of anterior segment surgery and has pioneered modern extracapsular cataract and implantation techniques. Such procedures are performed with the surgeon viewing the operative field through a microscope.

The John Muir Medical Film Festival was the inspiration of Bay Area physician Frederick Gottlieb, M.D. Appalled by the poor quality of educational films available in the health-medical field, Dr. Gottlieb generated interest among national authorities in medicine and film for a non-profit film festival. His dream became a reality in 1976, and since then this event has inspired talents from both disciplines to cooperate, and produce informative, creative films for a national film library - Filmedicus. This non-profit resource is part of the John Muir Memorial Hospital, Walnut Grove, California.

The John Muir Medical Film Festival is the only competition in the United States which accepts only health and medical audiovisuals. Helen Hayes and Dr. Michael DeBakey are active co-chairmen of the 75-member national advisory board of the Festival.

Hundreds of entries from independent film makers, ABC's 20/20 Newsmagazine,
Public Broadcasting Stations and hospitals pour into Filmmedicus each year to be judged by educators, other filmmakers, doctors and community leaders. There are categories for films for both technical audiences and the general public.

The best of this year's entries will be presented to the public during Festival week, June 21-27 at the Civic Arts Theatre and Gallery in Walnut Creek, 22 miles east of San Francisco. All showings are free.

Thomas Ager received his BFA in photography from Pratt Institute, New York, and initiated their present Medical Photography program. Before joining the McIntyre Eye Clinic staff, he served as supervisor of the first ophthalmic photography unit at Harkness Eye Institute (Columbia-Presbyterian Hospital) and as Projects Director for the Ophthalmic Research Foundation in New York City.

*Highlighted on this award winning tape are Capsulectomy, Nucleus Expression, Shearing In-The-Bag Implantation, and the Fish Hook Needle. Throughout much of the film, two images are seen simultaneously: that viewed through the microscope, and - in an inset - the surgeon's hand and finger movements. During microsurgery, every delicate movement is critical; illustration of 'cause and effect' enhances the effectiveness of a film as a teaching tool, the purpose for which EXTRACAP/IN THE BAG; MANUAL PROCEDURES was created.
BOARD OF DIRECTORS MEETING
First Session
Ophthalmic Photographers' Society
Saturday, October 31, 1981
Marriott Hotel
Atlanta, Georgia

Board of Directors members in attendance:
Kenneth Christopherson
Earl Choromokos
Kenneth Fong
Gerald Hoover
Carl Kittelson
Csaba Martonyi
Paul Montague
Bruce Morris
Terrance Tomer

Board of Directors members NOT in attendance:
John Johnson
Barrett Walker

Ophthalmic Photographers'
Society members in attendance:

Michael Coppinger
Marlene Fishman
Don Wong

1. Meeting called to order at 2:55 p.m. by President, Bruce Morris.

2. Bruce Morris (President) acknowledged that all members of the board were present except for John Johnson who has given his proxy to Earl Choromokos. The president acknowledged his invitations to Marlene Fishman, Frank Flannagin, and Don Wong to attend this session of the Board of Directors meeting. Their presence was appropriate because they are chairpersons of committees (i.e. Don Wong is editor of the O.P.S. Journal, Marlene Fishman is chair-
man of the Research and Development Committee, and Frank Flannagin is chairman of the By-laws Committee) which are on the agenda for discussion.

3. The president noted that Michael Coppinger sat in as an interested member of the O.P.S., and acknowledged that this was appropriate and offered only that there would be several instances where it would be necessary for the guest and the nonmembers of the B.O.D. to leave the room for the conducting of votes on several issues. It was also noted that these people, unless specifically asked for responses, would be out of place entering into any of the discussions.
4. The resignation of Barrett Walker was acknowledged. It was noted that one year remains to his elected office of Member of the Board of Directors. Bruce Morris (President) offered two names for nomination to fill this vacancy. Discussion from the members of the board concerned the considerations of these individuals and additional candidates to fill this vacancy. No additional nominations were made, and a vote was taken. Mr. Frank Flannagin was appointed to fill the vacancy for the duration of its regular term, to last through the first annual business meeting of November 1982.

5. Tom Van Cater resigned as resident agent of the State of Florida. The rules for the state of Florida state that we have a resident agent from the State of Florida in order for our organization to be a corporation and exist there. It was noted that the resident agent is responsible for filling out and forwarding to the appropriate executive officer once yearly all of the forms which are necessary for corporation status within the State of Florida. Csaba Martonyi nominated Gerald Hoover, and Paul Montague seconded this motion. A vote was taken with majority approval of Gerald Hoover as resident agent for the O.P.S. in the State of Florida.

6. Tom Van Cater who has served as the coordinator of the instrumentation session at the annual meeting since its beginnings, recently resigned this position. After discussion among the board, the consensus of opinion was that this job shall fall under the direction of the program committee which is chaired by the vice-president.

7. Marlene Fishman has resigned as O.P.S. historian. Due to the considerable amount of time required to perform her task as Chairperson of the Research and Development Committee, she felt that she had an insufficient amount of time to offer to the role of historian. Consequently, she feels this role will be better served by a less encumbered individual. Discussion among the board members produced the feeling that there is considerable value in maintaining an archive of minutes of the board, meetings, old newsletters, award winners, the original constitution, subsequent by-laws, journals, photographs, and all pertinent papers that relate to the governing of the organization. Much of the basis for the actions taken are derived from these materials, and they offer excellent sources of reference with a historical basis. The vacancy was not filled, but the decision was that the president, Bruce Morris, would decide on an appropriate individual to undertake the role of historian and would, at a later time, present this candidate to the board for its approval.

8. The finances were detailed by Paul Montague.

The first point of discussion was that the I.R.S. was sent a letter asking for a change of our fiscal year to eliminate the closing of our books twice within the year. As a result of this, it was pointed out that there needs to be a definition of the role of the Audit Committee so that the treasurer is able to provide information that the Audit Committee will need. It was pointed out that the Audit Committee would need extremely hard and fast guidelines and standing operation procedures in order to perform an auditing of the books. It was noted that the O.P.S. has never had an audit performed.
by an outside group. What has happened in the past is that our books have been looked at and the figures accounted for, but there has not been an audit performed. A motion was made and voted on by the Board of Directors that the Audit Committee have the books professionally audited. The motion was seconded and the motion was carried by a majority vote.

9. Paul Montague (Treasurer) offered that the majority of transactions take place following the national meeting, and that it would be of benefit to the incoming treasurer to have the outgoing treasurer carry on past the installation of new officers, until after such time that the majority of outstanding bills have been cleared (January?). Bruce Morris, President noted that from now on it shall be part of the duties of the treasurer to act as a consultant to the incoming treasurer until such a time as the money transactions have been cleared so that there will be an orderly transfer of the books.

10. Computer compatibility or total computer capability for the incoming treasurer was the next topic of discussion. The mailing list and general funds are kept on the computer in Iowa, and when the information to the incoming treasurer needs to be transferred, there might be a problem. Paul Montague proposed two possible solutions to these problems. First, that the O.P.S. purchase a small computer that can be passed from one treasurer to the next. Second, that the O.P.S. purchase a terminal which can be connected to a computer anywhere in the United States, and that this terminal then would be transferred from one location to another. Discussion ensued, and it was proposed that the central computer system be continued in Iowa, and that the society consider the purchase of a terminal. Paul Montague further authorized that the procedures will be cleaned up so that after he no longer is the treasurer, the programs can be utilized by subsequent treasurers. This proposal was accepted unanimously.

11. Since the projected balance for the general fund is significantly higher at the end of the fiscal year than it ever has been, discussion centered around what needs should be considered as a result of this money. It was noted that the certification procedure will cost considerably more than in the past, and that if we are to become affiliated with a national organization, we would have to pay dues into this national organization. The feeling of the board was that this money is not extra money but is money that we can, in the future, use as we need. The money is not a significant amount.

Karen Morris was asked to take a few pictures of the proceedings of the Board of Directors at this time. Karen entered the room to sit in on the discussion and photograph the meeting.

Monies in the general fund are a buffer for the certification process. It was also pointed out there are several items that the O.P.S. might consider purchasing, and that any monies left in the general fund do not serve as a surplus but a basis from
which to build the O.P.S. (i.e. computer hardware, photographic equipment for educational purposes, etc.)

12. The question was raised about the possibility that with more money than ever before in our treasury, do we need to solicit money for support? There have been no guidelines set down as to the appropriateness of methods for which to request services, monies, and equipment from the sustaining members. In the past, it has been left up to the discretion of the person in charge of doing that job, but it has suffered because that person has not had any guidelines or established criteria. In addition, there needs to be standardization of acknowledgment to the companies who contribute for tax purposes. Several members of the board discussed the topic of increasing the dues of the sustaining members to offset the need for solicitation of funds throughout the year. They pointed out, if dues were raised to a significant amount such as $500.00 or $1,000.00 per year. It was also noted that it is good publicity for many of the companies to be associated with some of the items which are donated for the annual meetings, like the notebooks, name tags, cocktails parties, etc. It was also noted that many of the companies contribute in ways that are not acknowledged by contributing equipment, personnel, and time which are not reflected as donations because there are no money transactions. The one important point generated from this discussion was that the solicitation process needs to be organized and overseen by a single individual, at this point the discussion was stopped and the board was adjourned to a dinner meeting. This topic was be rediscussed later in this B.O.D. meeting.

13. The establishment of a trust fund has not taken place since its discussion from the year previous. After discussion, the topic of the trust fund was tabled because the expenses incurred from hiring a lawyer to establish a trust table fund might be in excess of what the trust fund as proposed by George Zonduras might include.

14. The report from the Research and Development Committee was given by Marlene Fishman, Chairperson. Marlene described the background of the proposal for "R & D notes" which originated from The R & D Committee January 9, 1980 in a letter to the Board of Directors. The concept originated both from the R & D Committee and a suggestion from Dr. Richard A. Lewis. Originally, this was to be a trouble shooting manual, an ongoing project, a one or two page description of a photographic topic (i.e., electrical maintenance, mechanical maintenance, photographic materials, cameras, patient care and management, camera modifications, etc.). These one or two page descriptions would be such that they could be accumulated over a period of time and put into a working manual, a three-ring loose leaf binder. Discussion from the board members concerned who would be the governing body or editorial overseers of this project. President, Bruce Morris, offered that the R & D Committee is looking for an avenue to pursue a very realistic and open concept
with direction and guidance by the parent body as opposed to a maverick operation. After extensive discussion by the members of the board about the merits of including the R & D notes into the journal, it was unanimously held that the R & D notes are a valuable concept and a worthwhile contribution. Its value is that it will involve more people than otherwise would contribute articles, and who feel more comfortable writing a "short note". It will be overseen by both the R & D Committee and the editors of the journal, along with the Editorial Review Committee; this will allow the different groups to offer back to the author the option of revision for a feature length article for inclusion into the journal or a polishing up for a more comprehensive article. It was held that the R & D notes should be offered as a serrated page, able to be removed from the journal without any damage to the journal, and that more than one R & D note could be published in the same issue. This points out that what had appeared to be a clear cut, concise project as proposed by Marlene Fishman, January 9, 1980, actually needed to have an extensive period of discussion before the members of the board in a face to face meeting to discuss the merits, the values, the pitfalls, and the problems of such a project. This points out the effective mechanism with which the Board of Directors is able to accomplish the necessary ongoing mechanisms of the society without forthright, bullheaded, straight ahead approaches. Although Marlene Fishman felt that the period of time seemed to be overly long, perhaps burdensome for her to accomplish anything in this concept, she realized the value, after sitting through the extended period of discussion, of the board members concerning her R & D notes. This is an example of the mechanisms involved with the safeguards and checks and balances within our society.

The consensus of the board is that this project is extremely worthwhile, and that Marlene Fishman along with the members of the Research and Development Committee are to be commended for initiating this concept for an extremely valuable tool.

15. Fundus Camera Survey, a guide to fundus cameras.

Marlene Fishman, as chairman of the R & D Committee, proposed a comprehensive booklet of information from the grand masters that relate their modifications to their cameras that would foster a knowledge of the tricks of the trade to the new members of the society. It also would provide a listing of the cameras available and the options that are offered comparing each and become a comprehensive documentation of the fundus cameras available on the market. This then would allow people to make adjustments of the appropriate equipment for their needs. The discussion from the members of the board on this topic was unanimous that the O.P.S. should not be in a position of evaluating and comparing all the cameras available in order not to offend the sustaining members and camera manufacturers. It was felt it would be virtually impossible to eliminate subjective bias in certain areas that would have to be compared between cameras. Examples of these are reliability and serviceability of equipment, which could not be objectively evaluated. One camera might serve one individual far better than another type of camera, but these same pieces of equipment might not serve equally well for other individuals.
16. John Johnson submitted a proposed for a survey to the Board for consideration.

It was pointed out by Bruce Morris (President) that John Johnson presented the concept of a salary survey to the membership through the newsletter. The inappropriateness of this was that the Board of Directors had not sanctioned John to question the membership about their desire for a survey. Furthermore, the board had not requested a survey be conducted. Bruce offered that the newsletter was not an appropriate vehicle with which to conduct a survey, and that a more appropriate avenue to pursue should be through the Research and Development Committee. Discussion from the members of the board pointed out that the survey that might be conducted as per the suggestions by John Johnson would not be held to be credible by the institutions that would be evaluating the responses. Since this is a compromise situation because the membership has been conditioned to think about a survey in spite of no approval for such by the Board of Directors, Bruce offered the alternative of an R & D Committee survey. Marlene Fishman read the proposal for a survey from the R & D Committee. A very detailed and extensive survey covering four segments, institutional, small hospital, private business, and private practice. The goal was to provide information on what the individuals do in each of these four areas, what their salary is, how much they charge for different services, and their correlation between skill and training level. The mechanism was discussed on how best to accomplish a blind study and arrive at pertinent data. It was suggested that an outside agency might be a better vehicle for us to use for the conducting of a survey, to insure the validity and the anonymity of the answers. It was also noted that John received only six responses from the membership, which is not a hue and cry for a survey to be conducted. The reasons for having a survey would be to set up a standard for classification of individuals and a basis for salary ranges. The question was whether or not any survey could actually be done effectively enough to answer these particular questions. A vote was taken to see whether or not we wanted to conduct a survey at this point. A motion to shelve indefinitely the survey was carried unanimously, except for John Johnson's vote by proxy by Earl Choromokos.

17. A request was made by the board, of the Membership Committee (at a board meeting in Chicago) to design and present to the board, for their approval, a brochure describing the Ophthalmic Photographers' Society. Several ideas were put to the board with examples. The board approved unanimously the single page, typed description of the O.P.S. It was decided that a more detailed and fancier brochure is not necessary nor cost effective at this point. We will continue using the trifold membership application along with the newer one page handout.

18. The Nominations Committee.

It was pointed out that there were six members appointed to serve on the Nominations Committee, which is in error with the bylaws. There are only to be five appointed to the committee as
per the bylaws, and Earl Choromokos voluntarily dropped off of the Nominations Committee.

19. The discussion continued concerning the solicitation of funds.

There was concern about a conflict of solicitation with how much money any one company contacted should contribute. It was pointed out that the program coordinator is responsible for all solicitation. A question was asked if we should continue with solicitation? Should we seek items (notebooks, badges, ext.)? Should we seek money? Should we turn down any monies offered? The members of the Board of Directors felt that contributions should be without strings. Any contributions made should be contributions made to the general fund of the O.P.S. without stipulation as to where the money should go. It was further suggested that we can solicit for donations for time, equipment, notebooks, badges, etc., but not for money. Paul Montague (Treasurer), pointed out that in the future it will cost us money out of the general funds if we stop taking donations of money.

20. The Program Committee is going to make a separate mailing for San Francisco because of the special nature of next year's American Academy of Ophthalmology being an international meeting. This requires that members make the reservations earlier than usual in order to insure that they have rooms.

21. The historical black body Zeiss fundus camera which was used to perform the first fluorescein angiogram by Novotony and Alvis was offered for display at the O.P.S. exhibit. Ken Julian detailed in a letter to Bruce Morris, the offer by Dr. David Alvis. Ken Julian further proposed that a sale of prints of the first angiogram performed on Dr. David Alvis and a recent fluorescein angiogram performed on Dr. David Alvis by Ken Julian be offered for sale at the exhibit to establish monies for an educational trust fund. After discussion about the pros and cons of the sale of photographs at the exhibit, the members of the board unanimously voted in opposition of any sale of any photographs. Further, because of the complications of our establishing a trust fund, the idea of a trust fund was also vetoed. A committee was formed to evaluate the display and decide whether or not the display, as it was exhibited, was appropriate.

22. The Outstanding Contribution Award in Ophthalmic Photography is not to be given this year. There was no discussion at this point, but this was tabled for discussion at a Board of Directors meeting at a future time. The meeting was adjourned at 9:00 p.m.
BOARD OF DIRECTORS MEETING
Second Session
Ophthalmic Photographs' Society
Saturday, October 31, 1982
Marriott Hotel
Atlanta, Georgia

Board of Directors members in attendance:
Kenneth Christopherson
Earl Choromokos
Kenneth Pong
Gerald Hoover
Carl Kittelson
Csaba Martonyi
Paul Montague
Bruce Morris
Terrance Tomer
Frank Flanagan

Board of Directors members NOT in attendance:
John Johnson

1. Meeting called to order at 9:35 p.m. by President Bruce Morris.

2. Bruce Morris, (President) acknowledged that this meeting would be entirely dedicated to the attention of the proposed by-laws by the By-Laws Committee. At this point, Bruce gave the floor to Frank Flanagan, Chairman of the By-Laws Committee.

3. Frank Flanagan proposed that he simply read through all of the proposed by-laws, sentence by sentence, so that the board would have the opportunity of evaluating and making corrections after each clause and sentence. He then read the by-laws to the members of the Board of Directors.

4. Members of the Board of Directors discussed all questionable points in the proposed by-laws and offered remedies and changes to them.

5. After the proposed by-laws package was covered and recommendations made, the proposed by-laws package was sent back to committee for final typing. The board accepted the proposed by-laws with the modifications offered at this Board of Directors meeting. The Board proposed that this package then be reissued to all members of the Board of Directors for final approval.

6. After the Board has had a final chance to proofread and return back to the committee the by-laws, they will then be offered to the membership for a vote. This was the only topic of discussion at this session of the Board of Directors meeting.

7. Meeting adjourned at 11:10 p.m.
Ophthalmic Photographers' Society

General Business Meeting

Sunday – November 1, 1981

Marriott Hotel
Atlanta, Georgia

1. Meeting called to order at 1:50 p.m. by the President, Bruce Morris. Twenty-three members present which constitutes a quorum.

2. The President offered that all members have open access to the business of the society so that there can be a feedback for criticism and observation. We are a young organization which is learning to conduct itself as a business. Officers and leaders of this organization are occupied only on a part-time basis, making this an avocation as opposed to a full-time pursuit. With the increase in our membership role and an increase in the complexity of what we are performing as ophthalmic photographers, there is likewise an increase in the complexity of the task that the leaders of our organization are required to perform, and it is beneficial for the membership to understand and know the transactions of this society in order to better comprehend the direction that we are taking. Bruce Morris offered that he will use the newsletter as a vehicle for communication to the membership to convey the direction and intent of the organization to keep the membership abreast of what is happening.

3. The motion was approved that the minutes of last year's business meeting be accepted without reading.

4. The committee reports were presented.

Auditing Committee report was not given because the members of the Auditing Committee resigned their positions. Bruce Morris offered that in the discussion in the Board of Directors meeting that preceded this meeting, it was decided that we are not capable of auditing ourselves but we are simply accounting for what is in the books. This is only a review of the books, not necessarily an effective audit.

5. Awards Committee is chaired by Frank Lazenby.

The Awards Committee report will be presented at the second business meeting.

6. The Ballotting Committee has no involvement this year.

7. The Fellowship Committee has scheduled a meeting later in the week and a report will be given at the next business meeting.
The By-laws Committee report was presented by Frank Flanagan.

He addressed the outlook of the committee which was to simplify the nuts and bolts of the by-laws. To rectify the discrepancies between the actions of the society and the by-laws. Frank offered that the next year would be spent establishing the standing rules which help to give direction to the society. He also pointed out that the members of the Board of Directors at the second session of the Board of Directors meeting approved and accepted the proposed by-laws, and that these would, after retyping and printing, be sent to the general membership. A question from the floor concerned the mechanism by which new by-laws are enacted and the decision as to their content. Terry Tumer addressed the point of order of this question. He stated that the standing rules and by-laws specify that the elected members of the Board of Directors and the officers of the O.P.S. represent the memberships' point of view, and that it is their duty as the governing body to see that the by-laws are adhered to and maintained. Further, it is the Board of Directors' purpose to evaluate and rectify the by-laws. The membership has the opportunity to then vote on this decision.

The Finance Committee report was given by Paul Montague, Treasurer.

There were two requests after last year's audit. The first was that the president should be a bonded individual at the expense of the Ophthalmic Photographers' Society, and that he should have access to the checking account. This has been done. The second request was that we should check with a C.P.A. to see if our record keeping is in order. This has been done, and a C.P.A. has approved of our record keeping procedure. Paul Montague added that he cannot comment on the reason for the Audit Committee not having performed the audit of our books. Since they were furnished, the reports and the books, on two separate occasions. Further, he added that all members of the Board of Directors are sent monthly reports so that all board members know how the O.P.S. is financially. This also serves as a check and balance against the treasurer. Paul submitted the financial report (attached) and explained the funding of the general fund and the journal fund. The general fund is for all expenses of the society; whereas, the journal fund is separate. The ledgers are separate but contained in the computer system in Iowa City. The journal fund is solely for the journal expenses. The journal fund is self sufficient and not a drain from the general fund. Paul explained the future encumbrances on our balance are $2,000 for the directory, and somewhere between $13,000 and $17,000 for the expense of the national meeting.

Jeremy Pantell asked about the expense of the awards. Csaba Martonyi replied that the award expense covered the plaques, gavels, and certificates for the awards. Jeremy further
queried about specifics of what cost what at the national meetings. Bruce Morris, President, at this point projected
some slides of some documents from the 1971 national meeting. The expenses totaled $1,024.00. He pointed out that
it took three lines of a ledger to document the expenses of the national meeting vs. the five pages of computer print-
outs that it takes presently for us to document what monies have been spent where. He noted that it is a lot harder
job and more demanding now then it was back in 1971, and commented that the expenses are different, from $1,024.00
to somewhere between $13,000 to $17,000 today. He pointed out that Paul Montague has single handedly put the Ophthal-
mic Photographers' Society into the computer age and upgraded our accounting methods to a point that they are
thorough and extremely complete. He, at this time, commended Paul on his work and led the members in attendance
at the business meeting in a round of applause to express a thank you to Paul.

The journal fund ledger was presented, and it was not commented on except to state that it was just as the handout
indicated.

10. The Grievance Committee report was given by Ken Pong. There were no grievances to report for the 1981 year.

11. The historian position is presently vacant because Marlene Fishman has resigned her duties as historian in order that
she will be less encumbered and more capable of applying more of her time to the task of being the Research and De-
velopment Committee Chairperson. Bruce requested that if anyone is interested in assuming the position of historian
for the Ophthalmic Photographers' Society, they should submit a letter to him.

12. The Honorary Life Members Chairperson is Terry Tomer, and he described that this was a means of honoring someone
outside of the Ophthalmic Photographers' Society who has contributed to exploiting ophthalmic photography. He noted that
Lee Allen is the only photographer who is a recipient of this Honorary Life Membership Award. Terry explained that
the means of someone becoming an Honorary Life Member are that ample material is submitted to the committee describing
the person and their accomplishments and why they should be considered an Honorary Life Member. This then is pub-
lished for all the membership to see and vote on.

13. The journal report was given by Don Wong, (Editor). Don Wong presented two documents for the record. He also com-
mended Ken Pong as the associate editor for doing a very credible job without benefit of Don's assistance for much of
the year. Don pointed out that the journal has been published only in black and white up until this time and
that quite possibly a color issue will be coming soon. Don pointed out the need for constructive criticism con-
cerning the journal and also the submission of articles by the membership. He added that our journal compared quite
favorably with the BPA publications, except that we publish only two issues per year as opposed to four, and that our expenses are only half of what the expenses of the BPA are.

14. The Legal and Editorial Committee report.

Bruce Morris, (President) pointed out that Tom Van Cater no longer is the chairman of this committee and that he has resigned several positions within the O.P.S. Because of his current affiliation with Carl Zeiss, Inc., Tom is not able to meet the time commitments of the work for the O.P.S. Bruce noted that Tom has served the society very humbly for a long period of time, and that he has been our legal connection and a long time friend of the society. He will probably continue to be an active member. Editorial Committee was also chaired by Tom Van Cater who has resigned this position as well. There has been no decision made as to the appointment for a new chairman of either the Legal or the Editorial Committee.

15. The Membership Committee report from Ken Christopherson, Chairman, and Paul Montague.

Paul read the collection of the total membership. A question was raised as to how many are actually in the United States. This answer was unable to be given. Ken Christopherson read the flier that was authored by the Membership Committee and approved by the Board of Directors, and pointed out that this was our new source of information concerning the Ophthalamic Photographers' Society.

16. The Nominating Committee report was given by Emory Billings. Emory pointed out that there will be a meeting of the Nominating Committee during the week to discuss possible candidates and members for consideration for the coming elections for 1982. Emory also noted that Earl Choromokos dropped out of the Nominating Committee in order that the committee be in compliance with the by-laws which requires five members as opposed to six.

17. The Program Committee report was given by Gerald Hoover (Vice-president). Gerald recognized Frank Lazenby as being in charge of the registration and Paul Montague for the pre-registration, and he also acknowledged Csaba Martonyi for the work that he performed in putting together a very strong educational program. Gerry requested that there needs to be feedback from the membership in order to monitor future programs.

18. The Research and Development Committee report was presented by chairperson Marlene Fishman. Marlene noted that there are 35 members listed in the index, and that the index is a combination of articles that apply to ophthalamic photography. The function of the 35 members listed in the index was to read articles and offer summaries in the index. Marlene read her committee report concerning the R & D notes and also read the fluorescein report that was prepared by Larry Merin.
19. The Newsletter report was given by the editor of the Newsletter, John Johnson. He read his report (attached). He offered that he is pursuing tax exempt, nonprofit status which will save approximately one-half the cost of postage.

20. The Exhibit Committee is chaired by Ken Julian. The Exhibit Committee will offer its report at the banquet, which will consist of naming the winners of the numerous categories of the exhibit. It was noted that there is a lifetime loan to the Ophthalmic Photographers' Society of the first camera that was used to photograph Dr. David Alvis' eye. It is on display, with the exhibit, in the exhibit hall.

21. The Board of Certification report was given by Csaba Martonyi, Chairman of Board of Certification. Csaba indicated that there are presently nine members of the committee with two vacancies. Earl Choromokos, John Johnson, Ogden Frazier, Carl Kittelson, Dr. Richard A. Lewis, Bill Ludwig, Terry Tomer, Don Wong, and Csaba Martonyi. The two vacancies are Barrett Walker and Tom Van Cater. Csaba also pointed out that Ogden Frazier will be unable to continue in the capacity as member of the Board of Certification. He noted that these vacancies will be filled with members that were considered when the Board of Certification was formed, and that these slots will be filled, and the announcement made later in the week. Don Wong will assume the role of secretary to this group. There was only one test site this last year, since the Los Angeles test site was not able to be worked out. Csaba proudly announced that there are now approximately eighty certified retinal angiographers. He also pointed out that there are new study guides available which cost four dollars each, and these are an excellent source for preparation for the C.R.A. testing. There will be two testing sites in 1982. The first will be in March at the Devers Eye Clinic, hosted by Carl Kittelson. The second will be held in August in Philadelphia which will be hosted by Terrance Tomer.

Csaba stated that it is ultimately thought there will be three levels of certification. The work is progressing very slowly, but it is progressing. The next level, the second level, is not anticipated to be ready prior to 1983; and the third level, the master's level, is unique. It is unable to write test questions for this, since it is the foremost level. It is proposed that a panel of physicians will act as a panel of certifying members to test the level, master's level. They anticipate this being in effect by 1983. In 1983 there will be an attrition rate of three positions for which any member can apply. Every three years another three members will be dropped from the Board of Certification. An application for these positions will be available one year prior to the vacancy of these positions. Csaba noted that all the educational courses that are offered at the national meeting by the Ophthalmic Photographers' Society are courses that are conducted by the Board of Certification, and that this year
is an expanded program of last year, and that he envisions next year's program to be even further expanded. Csaba pointed out that there are three methods of evaluating the courses. The first is by the members of the Board of Certification. They monitor all courses, and the results of these evaluations are not made public. The second method is by the students themselves, they fill out the evaluation questions which are passed out at each course; these are not made public. The third method was detailed by Paul Montague, he pointed out the multi-page course evaluation sheet included in everyone's registration packet and urged every member to fill this out either at the end of the week or after having returned home. Each person needs to fill this out since this is the most complete evaluation that we will have from the members that attend the national meeting. Csaba noted that the Ophthalmic Photographers' Society had purchased model eyes for use in the slit lamp and fundus workshops. He also acknowledged that there is presently a one-to-one credit from JCAHPO for the courses that are offered by us.

22. Bruce touched on the subject of the salary survey that John Johnson proposed. He pointed out that John Johnson had submitted a packet to the Board of Directors for evaluation. Bruce noted that there were only six responses from the membership regarding a survey, and that this was not a very strong response. It constituted only one percent of the membership. He also noted that the board of Directors very painstakingly considered the options available as to the type and mode of a survey. Bruce noted that in order for the survey to provide data of any level of significance, it would be important that this was conducted at higher than rudimentary survey level. He noted that the type of survey that was proposed, which would be conducted by ourselves, would not stand up to any scrutiny.

23. Bruce Morris, (President), talked about the efforts to coordinate the meetings with JCAHPO. He acknowledged that Ken Woodworth, who is the President of AACHAPO, suggested that a joint meeting would save time and be beneficial to both AACHAPO and O.P.S. Unfortunately, the timing of the national meeting did not allow this to happen. Dr. Evans communicated with Bruce and indicated that it was a good idea, since the shared hotel would allow conveniences for both groups at this meeting. We are only a satellite group of the American Academy of Ophthalmology, and they could not find a hotel that would be sufficiently large enough to accommodate both groups. Additionally, our expenses would have been far higher had this happened, as opposed to our being stationed at the Marriot Hotel. In spite of this being a worthwhile idea, it will not be possible for this to happen in San Francisco either.

24. New business

Paul Montague again offered that we need to have the
program evaluation filled out so that we (Program Committee) can reflect on the ideas and the criticism, for the benefit of all for the coming national meeting. He stressed that this will be kept strictly confidential. Gerald Hoover, Vice-President, informed the membership that the San Francisco meeting will be an internal meeting, and that the registration fee for everyone who attends the American Academy of Ophthalmology will be $125.00, if they register prior to July 1. Otherwise, the registration will be $175.00. He will forward the registration forms to the membership as soon as possible. He offered that January 1, 1982 was the date that the program participants can register, and after March 1, 1982 all auxiliary groups can register. He added that in order to allow sufficient time for the Program Committee to augment the different sections of the program, it will be necessary that the cutoff dates be earlier than they have been in the past for submission of papers and talks from the membership. Gerry announced that Dennis J. Makes will be in charge of the scientific session, Don Wong will be in charge of the instrumentation session, Paul Montague will again be in charge of the pre-registration, and that Frank Lazenby would again be in charge of the registration at the meeting.

There was discussion from the floor as to the alternatives of staying at some other hotels than what the AAO allows us. It was pointed out that we are at the mercy of the Academy as to where we are able to hold our meeting places.

25. Bruce Morris (President) discussed his attendance by invitation to the Joint Commission of Allied Health Personnel in Ophthalmology meeting. He offered that it was extremely valuable, that they consider us very highly and extremely professional. He feels that what Csaba has accomplished by achieving a one-to-one credit value for courses that JCAHPO members will take from us is a great achievement. Bruce went on to account for his expenses to the Las Vegas meeting where he attended the executive JCAHPO board meeting.

26. The Chairman of the Board of Directors report to the membership by Bruce Morris, (President, Chairman of the Board of Directors). Bruce announced the election of Frank Planagin to the Board of Directors to replace Barrett Walker. He acknowledged that there were no replacements to the committees which Tom Van Cater has vacated. He also noted that the board will make the standing rules of operation within the society a paramount project for this next year. He acknowledged that the computer has been an incredible bonus for us and can be an even bigger bonus in the future, and that this has been an under-utilized tool, but that we are learning to understand and cultivate its use. On the topic of solicitation of money, he noted that we have, in the past at times, done well and not so well, but he is uncomfortable to let it proceed the way that it
REPORT ON THE RESEARCH AND DEVELOPMENT COMMITTEE - 1981

1. CURRENT LIST OF MEMBERS (TOTAL = 35 OPS MEMBERS)

   Shirley A. Aids          Lucille U. Lane          J. Wanda Rummel
   John Bishop Jr.          Paul M. Larson          Thomas Schuch
   Mark Bernstein          Frank Lazenby            John Sears
   John Canto              William Ludwick          Daphne Sheets
   Richard Cortez           Dennis J. Makes          Marty Shuer
   Martin R. Chrobak        Kirby R. Miller          Randy Spencer
   Margo Cushman            Doug Moody              Gerard Tetreault
   Sheldon Dukoff           Paul Montague            Steve A. Thomas
   Mary A. Federico         Ronald B. Morales        Tom Van Cader
   Michael Foxworth         Jeremy Pantell            Scott Wong
   Darryl Freilinger        Ivan Pieper              Marlene Fishman, Chairman
   Ernest H. Heath          Marty Rothenberg

2. FUNCTIONS OF THE COMMITTEE MEMBERS

   The above committee constitutes the Editorial Board and Assistant Editors of
   the Ophthalmic Photography Index, an annual publication created by the
   committee chairman, also Chief Editor, Marlene Fishman.

   The role of the Editorial Board members in the production of this project is to
   read articles referable to ophthalmic photography (which are assigned and usually
   supplied), and to summarize them for inclusion in the publication. Some changes
   (additions or eliminations) in the number of participants occur annually.
   The role of the Assistant Editors is to disseminate some of the articles to staff
   members and to review the corresponding summaries.

3. OPHTHALMIC PHOTOGRAPHY INDEX

A. For the past two years (1979, 1980), the principle activity of this committee has
   been to produce the Ophthalmic Photography Index, an annual research reference
   guide on subjects referable to ophthalmic photography. This project is designed
   not only to provide a service to our professional society and the ophthalmology
   community, but also to serve as a self-education vehicle for the members who
   participate in its creation.

B. This year the OPI will once again publish a collection of approximately 380
   literary references, partially abstracted, which appeared predominantly between
   the years 1979-1980 (last year's covered 1978-79, the previous year's covered
   1977-78, etc.). In addition, two new aspects have been added to the previous
   selection of topics covered: Light Toxicity from Ophthalmic Instrumentation, and
   "For Your Interest," a limited list of additional articles on subjects that are
   peripherally related but clearly pertinent to the responsibilities of the
   professional ophthalmic photographer, such as adverse effects of dilating drops.
is. He will offer a proposal for a method of cleaning up our act on solicitation in the future.

27. A call for further business. The question arose about the possibility of utilizing the already present meeting places of Royal Oak and New York which are mid-year vs. the national meeting at the site with the American Academy of Ophthalmology. The topic was tabled for discussion at a future Board of Directors meeting.

28. The meeting was closed at 4:45 p.m.

Minutes recorded by
Kenneth Christy
4. FLUORESCIN DEVELOPMENT SURVEY

A. In 1980, the R & D Committee issued a survey to the membership of the OPS, primarily designed to ascertain the materials (film and chemistry) currently being employed to produce fluorescein angiograms. This information was sought in part for a presentation on this topic at the 1980 Academy meeting. The presentation of this topic was designed in response to a request from one of our members, Jeremy Pantell. The survey and presentation (participants were Marlene Fishman and Larry Merin) were performed as a service to our membership. See attached preliminary results.

B. 83 of our OPS members responded to the initial survey. Due to the unique value of the cumulative results of this questionnaire, which were solicited by Mr. Martin Scott, representative of Eastman Kodak Company, further pursuit of additional responses to this survey were sought. A slightly modified questionnaire was created in order to elicit somewhat more detailed information. This modified version appeared in the May-June, 1981 OPS Newsletter. To date it has produced 40 responses, 13 of which are updates from last year's issue.

C. The goal in this project is to accumulate at least 200 responses to this questionnaire, tabulate and report the results. Members of the R & D Committee will be asked to volunteer assistance in the follow up of some incomplete responses and in the final analysis of this information. Records on which of our members have responded to the survey have been kept. A third appeal for response to this survey will be mailed in December, 1981 directly to all individuals who have failed to respond to the first and second issues. A bulk mailing permit which has already been purchased for the use of the Ophthalmic Photography Index mailing and paid for by Alcon Laboratories will be used for this purpose. Data on the responses to this survey will not be calculated until a more representative percentage of our total membership has responded.

5. CONSUMERS' INDEX OF FUNDUS CAMERAS

A. In response to a suggestion made by Dr. Richard Lewis that ophthalmic photographers become better acquainted with the various differences between fundus cameras (see attached letter), a finite project designed to produce a pamphlet on this subject has been created. Martin Chrobak is in charge of this production. A formal proposal and description of this communication will be submitted to the Board of Directors prior to the 1981 Academy meeting.

B. The contents of this publication will cover the basic descriptions of all currently available fundus cameras, their particular features and capabilities, and cost (see outline). Publication in the Journal of Ophthalmic Photography with saleable reprints will be discussed at the Academy meeting.

C. The result of this project should be invaluable assistance to not only many members of our organization, but many ophthalmologists seeking some guidance in the decision-making process of choosing a fundus camera.
6. "R & D NOTES"

A. Dr. Lewis' encouragement for the OPS to provide some way of communicating and disseminating the various modifications to fundus cameras that have been devised by our own members, in part prompted a second project that has been proposed at the beginning of this year (see letter to Bruce Morris, dated January 9, 1981). The design of this publication not only answers the need to document and to give appropriate credit to the persons responsible for various instrumentation modifications; it also encompasses the concept of an ophthalmic photography "working manual", technical reference source, or the "trouble shooting manual" which has been the objective of much discussion for the past several years within the R & D Committee and elsewhere within our organization.

B. "R & D Notes" is designed to be an on-going format for brief communications written and reviewed by members of the OPS. A variety of topics referable to ophthalmic photography will be applicable to this continuous project, including all aspects of instrumentation, such as techniques, modifications, and maintenance; several photographic aspects including film selection, development and printing, and various approaches in patient management. The broad spectrum of acceptable subject matter and the brevity of length for each contribution (1-2 pgs.) provide a flexible opportunity for many of our members to achieve recognition for their unique achievements and skills.

C. As described in the enclosed letter, the R & D Notes will be supplied on 8½ x 11 pre-punched paper so that each selection can be easily inserted into a looseleaf notebook, utilizing dividers for different aspects of ophthalmic photography. This format is ideal not only for easy access to technical information, but for storage of important reprints on these subjects as well.

D. Discussion regarding protocol and format for the execution of this project is scheduled to take place in the Board of Directors meeting at the Academy.

Respectfully submitted,

Mrs. Marlene Fishman

ANNUAL REPORT

EDITORIAL COMMITTEE

The Journal of Ophthalmic Photography has continued on its path of growth with the two issues published over this past year. The fundamental concept of this Editorial staff of offering basic educational material has been very well received. It is therefore our intention to continue to develop the Journal into one of the society's primary sources of education, as well as continuing education.

The Editor would like to formally commend Mr. Kenneth Fong, the Associate Editor. Due to a particularly heavy personal schedule, Don Wong found it necessary to drop the activities with the Journal entirely, and in the absence of the Editor, Ken Fong was able to step into the gap and take over the production of three issues of the Journal completely, without any loss of continuity or quality. This capability of the committee to function without loss of continuity despite the absence of one of its members is our greatest asset, and the OPS is most fortunate to have such members as Ken Fong.

Respectfully submitted,

Don Wong, RBP, FOPS
Editor

General Business Meeting
Second Session
Ophthalmic Photographers' Society
Saturday, November 5, 1981
Marriott Hotel
Atlanta, Georgia

1. Meeting called to order at 9:46 a.m. by Bruce Morris (President). Twenty-three members were present constituting a quorum.

2. The minutes of the first business meeting were accepted without being read.

   The committee reports that were not given at the first session of the business meeting were presented.

3. The awards committee, Frank Lazenby (chairman), selected the exhibit, Red Krypton Laser Photocoagulation in Macular Disease, as the exhibit that best represents utilization of the highest quality of photography. Frank Lazenby offered that it was unfortunate that many of the exhibits do not reflect the photographer that produced the photographs. The exhibitors are: Felix Sabates, M.D., Kig Y. Lee, M.D., Mathew C. Ziemianski, M.D., Garry Gallimore, C.O.T., Terry Duffy.

4. The Fellowship Committee reported that John Johnson was elected to the honor of Fellow of the Ophthalmic Photographers' Society. The announcement was made at the banquet.

5. The Nominating Committee pointed out that they had worked very hard and constructively throughout the week.

6. The Program Committee report was given. Bruce thanked Gerald Hoover for his involvement in production of the program this year, and asked that any input from the membership be directed to Gerry concerning the program throughout the year. Gerry Hoover called for help during registration at next year's national meeting. From the floor, Mary Federico offered that a rip out mailing in the newsletter that would have a spot for someone to indicate where they wanted to help, might encourage people for next year's meeting. Bill Ludwig offered that next year's academy registration of $125.00 is going to make it harder to get help monitoring the exhibit. He pointed out that in past years helpers at the exhibit were given badges to enter and work at the exhibit free; whereas, at this next meeting in San Francisco everyone is going to have to pay the $125.00 registration fee.
7. There was discussion of the San Francisco meeting.

Again it was offered that $125.00 will be the minimum registration fee until July 1st, after which time it will be $175.00. The question was asked which hotel will we be in next year. Bruce stated that the academy had requested our information concerning hotels before September, but they have not provided us with the information about which hotel we will be getting. Also, it was noted that the A.A.O. did not object to us notifying the membership about which hotel they can register with, either through the housing bureau or independently. Bruce added that our organization is doing very well in dealing with the American Academy of Ophthalmology. It was pointed out that next year's meeting will be more expensive than any other meeting has been in the past because we are not benefiting from free room uses for our meetings. There was discussion about modifications to the program for next year. Could we move the schedule up to Saturday or Friday for the start of the meetings? Could we change the awards to be at the cocktail party? Could we change the banquet to include a business meeting with the installation of officers, etc.? These were all questions that went unanswered and will be considered by the Board of Directors. Bruce acknowledged his appreciation for the response that Dr. Bloidi was given by the members that attended the banquet. He was proud to see such an orderly and professional manner displayed. A question was raised whether or not the fees will change for courses next year which are conducted by the O.P.S. Gerald Hoover, Program Chairman, Vice-President, and Paul Montague, Treasurer, pointed out that we need to evaluate the registration fees for next year after we have had an opportunity to evaluate what our expenses were at this meeting, to see what money came in per person, so that we will be better able to estimate the required cost to cover next year’s expenses. The membership offered that they feel the meeting should be self-sustaining and not adjusted from the balance of the general fund. Paul does not anticipate an increase in the registration cost for next year's meetings. Paul also feels that the difference in price for preregistration of $10.00 is a very nice incentive to preregister, and it eliminates a lot of burden of those working in registration.

8. A suggestion from Ivan Pieper to consider judging the technical exhibits in the future. Gerald Hoover responded that this would not be good policy since it could smack of an endorsement. Bruce further offered that we are tending towards internal payment of our own functions, and that we are presently paying for our own cocktail parties, etc. It was further pointed out that MIRA conducted its own cocktail party. All we did was pay $40.00 for the announcement of the MIRA cocktail party.

9. Old Business

The copywrite of the logo was discussed

Bruce Morris, President, related that the O.P.S. logo is used primarily by us, but is also being used by some commercial
ventures. We feel that this is our logo and do not want it to be abused. Bruce applied for a patent trademark and has as of yet not sent it back with a registration fee.

10. Mary Federico and Michael Coppinger requested that the O.P.S. offer spouse information prior to the San Francisco meeting concerning babysitting and events as a goodwill gesture. This was referred back to the B.O.D.

11. A request was made for adjournment of the meeting, this was seconded and accepted. The meeting was adjourned at 11:30 a.m.

/Candidates for Coming Election

The following pages will introduce you to OPS members who have been nominated for offices and board positions. Please read about the candidates carefully so you may be familiar with each one's qualifications. A ballot will be sent to you at a later date. When you receive it, please vote and return your ballot as quickly as you can, remembering to sign your name at the appropriate place designated in the instructions.

Thank you.

DEADLINE FOR NEXT ISSUE OF NEWSLETTER—July 26th, 1982.
The Ophthalmic Photographers' Society is comprised of individuals with a variety of backgrounds and needs. Photography of the eye is the primary reason for the group's existence. In 1969 the society was formed because of the need to compile ideas and information for the few who were involved with this new discipline within ophthalmology. In its infant state there were only a dozen members. Just a decade later there are over six hundred. The premise remains the same today as it was at its conception: The society enables people to learn from one another.

The society provides for the sharing of information in order to grow. Regional chapters of the OPS sponsor meetings which promote the exchange of information and provide professional association for members throughout the year. The national organization publishes a bi-monthly newsletter which informs the membership of OPS events, and semiannually publishes The Journal of Ophthalmic Photography, providing educational tutorials and papers on ophthalmic photography.

The national meeting of the OPS is held in conjunction with the annual meeting of the American Academy of Ophthalmology. The program includes presentation of papers on scientific and instrumentation advances and an extensive educational program covering the techniques of ophthalmic photography.

In 1979 the society initiated a program of certification for ophthalmic photographers. Certified Retinal Angiographer is the base level of what will be a three level certification system. Successful completion of written and practical examinations plus examples of work which meet established standards are required for certification.

Our membership includes ophthalmologists, pathologists, medical and ophthalmic photographers, nurses, ophthalmic assistants, technicians, technologists, researchers, and engineers. Active members are individuals interested in promoting the objectives of the society. Sustaining memberships are open to organizations and individuals who are actively involved with ophthalmology or ophthalmic photography for commercial or charitable purposes. New memberships are initiated by submission of an application to the chairman of the membership committee. Anyone actively involved in ophthalmic photography is encouraged to apply.
