Dear Member:

As a decisive step in expanding the scope and depth of education in ophthalmic photography, the Society is offering a new summer program. Its primary goals are two-fold; first, to provide a more comprehensive, progressive format of education for the principle disciplines, and second, to make available ophthalmic photographic education to those unable to attend the fall meeting.

Unlike the fall meeting, which is hampered by concurrent programs often in conflict with our own, the summer program provides an opportunity to utilize a more effective format. Self-evaluation quizzes will provide self-directional information as to the level and subject most needed. Counselors assigned to small subgroups will create "families" with similar needs and goals. Counselors, quizzes, and numerous opportunities for informal discussion will combine to produce a highly effective learning experience in a specific subspecialty.

A single registration fee will cover three-plus days of lectures and workshops. Presentations on anatomy, physiology, pharmacology, photographic principles, introduction to specular micrography, descriptive interpretation of angiograms, and the fluorescein conference will be provided to everyone. Fundus and fluorescein photography will be addressed at all levels, tailored to the needs of each subgroup. Individuals preparing for CRA examinations will find this time-line particularly useful. For those interested in photo slit-lamp biomicrography, we offer for the first time an in-depth, three-period course followed by workshops. The congenial, informal setting of Park City, Utah, should provide a most enjoyable and conducive atmosphere.

Pre-registration information and a more complete description of our Summer Education Program will be forthcoming shortly.

Sincerely yours,

Csaba L. Mantonyi, P.O.P.S.
Chairman, Continuing Education Program
Chairman, Board of Certification
CALL FOR PAPERS

A "Free Paper Session" will be held at the Ophthalmic Photographers' Society first mid-year meeting in Salt Lake City, Utah, July 7-12, 1984. This three hour session will be your opportunity to present a ten minute paper dealing with various aspects of ophthalmic photography. All authors are requested to submit a one paragraph summary of their paper to be considered, covering a scientific or instrumentation subject of choice to:

J. Michael Coppinger, M.A.
Route 1 C
Box 363
Shaftsbury, Vermont 05262

DEADLINE: APRIL 1, 1984

OPS PHOTOGRAPHY INDEX

All OPS members should have received their new Ophthalmic Photography Index, Volume 5. Congratulations to chief editor, Marlene Fishman and her staff who include assistant editors Sadac Kanagani, F.O.P.S., John Canto, C.R.A., Alan Frolichstein and editorial advisor Maxine Gere and research consultant Mary Winnike, on preparing another excellent issue. Your efforts in gathering data and presenting it in a convenient format are very much appreciated.
SUPPORT GROUP NEEDED FOR UTAH MEETING

If you are planning to attend the first OPS Summer Education Meeting as mentioned on the first page of this newsletter and would like to volunteer a few hours working with other OPS members in the Support Group, please contact Mr. Ken Timby, Support Group Coordinator. Many of you who attended the annual meeting in Chicago and served as a member of the Support Group are familiar with how this group functions, its duties and work assignments. For those of you who have not served in this capacity, you should know being a member is an excellent way to meet new members and assist in the overall educational program. Typical work assignments may include setting up rooms for workshops, monitoring lecture rooms, attendance verification and providing information for participants regarding times and locations of various courses. Experience has shown that Support Group members have enjoyed their individual efforts assisting in this fashion and Mr. Timby has demonstrated a very organized method of assigning responsibilities. If, by reading this, you feel it is a sales pitch for becoming a Support Group member, you're right! In order to make the Summer Educational Program a success, your help is needed. So, if you are planning to attend, contact Mr. Timby so he can begin assigning Support Group members their duties and work stations. You'll really be glad you participated in this extremely worthwhile group.
