Professor Choromokos Honored

by Ken Timby, C.R.A.

On June 10, 1984, Earl Choromokos was honored by the University of Cincinnati at their commencement exercises. Earl was presented the University of Cincinnati Award for Excellence by University President, Henry R. Winkler. The award read in part:

"Your reputation as an authority in the field of ophthalmology has been gained through the exercise of your lively curiosity and native intelligence. A voluminous bibliography attests to your thorough familiarity with the subject and to your energetic and perceptive investigation of the ocular mechanism."

Respect for your competency as a professor is widespread; you are known as a rigorous and demanding instructor, generous with your time and expertise, proficient in your ability to present an informative amalgamation of theory and practice. A shrewd and compassionate judge of human character, you have distinguished yourself in identifying talented newcomers to the field and in encouraging their further development.

Earl Choromokos, in recognition of your contributions to ophthalmology and the University of Cincinnati, it is my pleasure to present to you this University of Cincinnati Award for Excellence.

We in the OPS have long known and appreciated this talented man. Earl, from all of us, congratulations on this truly distinguished award.

1984 Scientific Exhibit

The American Academy of Ophthalmology has again accepted the OPS Photographic Exhibit into their Scientific Exhibit section at the annual meeting of the AAO.

The deadline for receipt of submissions is no later than Friday, September 21, 1984. If you have not received your CALL FOR PHOTOGRAPHS, have general questions or particular questions pertaining to the Print Division, contact Martin Chrobak at (415) 563-4075. Questions pertaining to the Stereo Slide Division should be directed to Thomas Egnatz at (317) 926-1517.

A new Print Division category has been added this year, entitled, Clinical Setting Photography. Photographs in this category should demonstrate the delivery of eye care, the patient/physician encounter or the performance of an exam or technique. PR, advertising and instructional photographs would fall into this category.
Chicago Chapter News

by Alan Frolichstein

Chapter President

The July meeting of the O.P.S. Chicago Chapter was held at the Museum and School of the Fine Arts Research and Holographic Center in Chicago. Our hosts for the evening were Loren Billings and John Hoffman, the Centers Directors. We began with a tour of the holography museum, which has an international holography display. After our initial view of the gallery, a movie on holography was presented. Next came a question and answer session, after which we returned to the museum gallery to view the holograms with a better understanding of what was being presented. This was a very enjoyable meeting, and the entire Chicago Chapter wishes to thank our hosts at the Holography Center.

Positions Available
