OPS 20TH ANNIVERSARY YEAR A TREMENDOUS SUCCESS

Mark Maio presenting the Johnny Justice, Junior Award to Johnny Justice, Jr.

Sadao Kanagami, FOPS, from Japan, with his lovely daughter Chiika.

Founding members of the OPS receiving their awards.

LETTER FROM THE PRESIDENT
I can not believe that it has only been a short year since I was elected your president. It seems like only yesterday that I was wondering how I was going to learn about all the things a president of an organization has to do. Now I wonder if I will have enough time to be able to finish half the projects started this past year. The office of president, along with all the others in our society, puts huge demands on both personal and professional time. Because of this and my belief that new people with new ideas are good for the OPS, I have decided not to run again as a candidate for president. However, I will remain on the board as Past President for two years after my term expires. Some of the other present board members have time left on their terms of office, so I am sure that the direction this board is moving will continue. Fortunately, the Board of Directors is arranged in a way that provides for this continuity.

Writing this column a month after our annual meeting, it is hard to believe that we did so much in just one week. This was our most ambitious undertaking to date. Physically I still have not recovered and Mike Coppinger, the general meeting chairman, must still be exhausted. I want to thank Mike for the months of preparation and the endless hours he put into making our meeting such a success. His meeting report, along with financial data, will be published in the next newsletter after he receives a few remaining bills. I would also like to thank everyone who donated their time and energy lecturing, instructing in workshops or just helping. Without all of you and your continued support, we would not be able to offer you, the general member, such a complete educational and social program.

In conjunction with a historical program on the first day of the annual meeting, a reception was held honoring the founding members of the OPS. Twenty years ago, these individuals had the foresight to create an organization that has been a tremendous benefit to us all. They were all presented plaques from the Society as a way of saying thanks. One founding member, Ogden Frazier, was also presented with the OPS Honorary Life Membership award for his contributions to the OPS throughout the years.

A special slide-tape presentation produced by John L. Johnson, F.O.P.S., depicting the first twenty years of the Ophthalmic Photographers' Society was presented at the historical program. The 640 slide, 39 minute program utilized four projectors and two dissolve units and was accompanied by several familiar musical recordings, synchronized to the historical slides.

Another highlight of the evening was the announcement of the Johnny Justice Junior Scholarship Award. This award, named after Johnny in recognition of his teaching and influence as primary founding member, was established to provide monetary support to motivate ophthalmic photographers who wish to advance their education. The application process and criteria by which the scholarship will be awarded are still being worked out. Preliminary plans call for money to be encumbered in our next budget which will be set aside in an interest bearing account. The interest earned each year will be awarded to OPS members who want to take courses but do not have enough money. Johnny Justice, through his company The Angiogram Reading Center, is donating $100 a month as a way of showing his support and appreciation for this award.

More information on the award will be made available after the next Board of Directors meeting.

At the end of last summer, you were asked to vote again on a ballot regarding the separation of the educational component from our Board of Certification and the creation of a Board of Education. This ballot was necessitated by an inadequate voter response to a similar ballot conducted the previous year. To affect a change in our bylaws, 51% of our eligible members must vote, and of those responding, 2/3 must vote in favor of the change. Despite a few problems encountered with the company that printed and mailed this last ballot (they did not include return postage on the envelopes and failed to remove the incorrect return deadline), we were able to get enough response to pass these amendments. The results were:

**Amendment I Results:**
- Total Ballots Received = 419 (majority needed = 407)
- Total YES votes = 404
- Total NO votes = 15

**Amendment II Results:**
- Total Ballots Received = 419 (3 blank)
- Total YES votes = 393
- Total NO votes = 23

**Ogden Frazier honorary lifetime member:**
- Total Ballots Received = 392 (4 blank)
- Total YES votes = 384
- Total NO votes = 4

With the creation of a Board of Education, I felt we needed a joint meeting of all three boards (Board of Directors, Board of Certification, Board of Education) at the beginning of the annual meeting. As we grow as an organization and expand the services we offer our members, there is always the chance that this growth could produce more problems than we can foresee. I wanted to define and discuss the responsibilities of each board and the way each will interact with the other. By doing this, I hope we can keep the problems these changes might create to a minimum. I was very pleased at the end of the meeting and I felt we all came away with a sense of unity and cooperation.

One result of this meeting was the decision to invite a representative from each board to attend any official board meeting. This person will not be afforded voting status, but will be viewed as a source of information and advice. We felt that if all boards were more informed on the issues and problems faced by other boards, it would be easier for all to work together towards common goals. Should you have any questions, comments or if you would like anything placed on the agenda of the boards, you may contact Earl Choromokos regarding the Board of Certification, Emery Billings - Chairman of the Board of Education or me for the Board of Directors. If you have any item you would like placed on the BOD agenda, please get it to me before the middle of January. This is your society and only with input and feedback from you, can we really tell if we are doing our jobs.

I hope the New Year finds you all well after an enjoyable holiday season. Good luck with all the patients that put off having fluoresceins until now because of Christmas.

Mark Maio
OPS SCIENTIFIC EXHIBIT WINNERS
ANNUAL MEETING NEW ORLEANS

AAO SPECIAL AWARD FOR

PERSONAL PHOTOGRAPHY SALON PLANNED FOR NEXT
ANNUAL MEETING

Over the years, many of us that do photography as an art form outside of our jobs have informally discussed getting together during the annual meeting to show our photographs to one another. This past annual meeting in New Orleans, Don Boyles, Frank Lazenby, George Weir and I met for a few hours to show our work. We discussed the possibility of a salon of non-ophthalmic photographers to be included at the OPS annual meeting next year in Atlanta. We have already reserved a meeting room in the hotel next year and plans are underway to acquire non-OPS funding to cover any expenses. Should you be interested in participating or showing your photographs, please contact any of us.
Mark Maio

OPS ISSUES

THE FOLLOWING COLUMN HAS BEEN DEVELOPED TO DISCUSS BOARD CERTIFICATION AND BOARD OF EDUCATION ISSUES.

EDUCATION AND THE OPHTHALMIC PHOTOGRAPHER

The Board of Education is an 11 member body responsible for designing and carrying out the educational programs of the OPS. Formerly a committee under the Board of Certification, the Board of Education now operates independently under the direction of the Board of Directors.

In order to provide information on the structure, operation and plans of the BOE I will, from time to time, include short informational columns in the Newsletter.

First, let me emphasize, the BOE is anxious to hear from OPS members. We want to know what you expect and need from the educational effort. The survey form included in this Newsletter is very important. We hope you will take a few minutes to communicate your thoughts to us. This Spring the BOE meets to map out educational programs for the next several years and we want all the member input possible. What factors are important to you? We can and will try to make our educational programs meet your needs, but we need your input.

On another matter. Do you want to participate in an educational program? Let us hear from you. If you have a good course idea send me an outline along with your CV or a brief resume. With Don Wong’s able guidance we are developing mechanisms for assisting potential lecturers.

If you want to work as a workshop instructor, your name will be forwarded to the appropriate workshop coordinator. This is an excellent avenue for becoming professionally involved in the OPS. The continual development of a competent, reliable educational staff is important to the BOE. Equally important is the personal and professional growth to those who become active educators in their professional society.

Emery E. Billings, CRA, FOPS
Chairman, Board of Education

CERTIFICATION AND THE OPHTHALMIC PHOTOGRAPHER

Starting with this issue of the OPS newsletter, a section will be included in each issue devoted to Certification. This section will contain Board of Certification activities, lists of certified members, announcements of certification testing sites, National Organization for Competency Assurance (NOCA) and National Commission for Certifying Agencies (NCCA) news items, and other interesting information that may be of value to the membership.

The reason for this section is multifaceted. Approximately one third of the OPS membership is certified. There is a trend, supported by state and federal agencies, for the certification or licensure of health care personnel. In the future, this may become mandatory. Other ophthalmic health care groups (JCAHPO, ASORN, Contact Lens Society and the Ocularists) have instituted certification programs that are accredited by the National Commission for Certifying agencies.

For these reasons the Board of Certification and the Board of Directors felt the need for this section in the newsletter. The editor of this section will be William J. Shields, C.R.A., B.C.E.

Bill will coordinate information between the B.O.C. and Colleen Eardley, the newsletter editor.

Earl A. Choromokos, C.O.P.R.A., F.O.P.S., B.C.E.
Chairman, Board of Certification

CERTIFICATION EDITOR’S NOTE

As Earl mentioned in his letter, the OPS Newsletter will include a regular section on Certification. I would like to invite the readers of the newsletter to participate in this section. If you have questions regarding Certification, chances are others have the same questions, so please write. I will find the answer and print it in this Section for everybody’s benefit. If you would like to comment on any of the issues before the Board of Certification I will be happy to include your comments in this Section, and if appropriate a response from the BOC.

In my view this Section has three purposes, one, inform the membership of Certification issues, two, promote our Certification programs, and three, provide a mechanism to formally discuss and debate Certification issues.

Please send any questions, comments, or suggestions to the following address:

William J. Shields, C.R.A., B.C.S.
Instructor at Georgetown - Center for Sight
Georgetown University Medical Center
3800 Reservoir Rd., N.W.
Washington, DC 20007

NEW CERTIFIED RETINAL ANGIOGRAPHERS!

Congratulations to the following individuals for their successful completion of the CRA Program in 1989:

Lynda Azar, RN, C.R.A. Audrey Jorgensen, C.R.A.
Charles Bouiska, C.R.A. Pamela Lathrop, C.R.A.
Nicole Choromokos, C.R.A. Joseph Logan, C.R.A.
David Clay, C.R.A. Stewart Martin, C.R.A.
Paul Comeau, C.R.A. Nancy McGee, C.R.A.
Tamara Cunningham, BA, C.R.A. Debra McGhee, C.R.A.
Anton Drew, C.R.A. Patricia Meaney, C.R.A.
Denise Driver, C.R.A. Betty Mereness, RN, C.R.A.
Steve Ericson, BS, C.R.A. Dulan Mills, RN, C.R.A.
Eileen Frommer, C.R.A. Lela Mullinix, C.R.A.
Karl Glaebner, C.R.A. Beverly Radcliffe, C.R.A.
Stephen Gushue, BS, C.R.A. Dwayne Reif, C.R.A.
Richard Hackel, C.R.A. Kelly Smith, BA, C.R.A.
Ross Jarrett, C.R.A. BS, C.R.A.

Cont. on pg. 5
NEW CERTIFIED OPHTHALMIC PHOTOGRAPHER & RETINAL ANGIOGRAPHERS

Congratulations to the following ophthalmic photographers for their successful completion of the COPRA Program in 1989:
Ken Christopherson, C.O.P.R.A.  Csaba Martonyi, C.O.P.R.A.

CHANGE OF ADDRESS NOTICE

All Non OPS Certified Retinal Angiographers are responsible for maintaining their current address with the Board of Certification. Without correct addresses non OPS members can not be notified of recertification deadlines and other information regarding the Certification programs. In order to check or update your address please contact Mr. Terrance Tomer, F.O.P.S., C.O.P.R.A., B.C.E. in writing at the following address:

Terrance L. Tomer, F.O.P.S., C.O.P.R.A., B.C.E.
Director of Diagnostic Photography
Wills Eye Hospital
9th and Walnut Streets
Philadelphia, PA 19107

ATTENTION EXECUTIVES!

The Nominating Committee is formulating the final list of candidates for the July 1990 election. Members interested in running for executive offices are strongly encouraged to participate in the government of the Society.

AN OPHTHALMIC PHOTOGRAPHER'S EXPERIENCE IN SAUDI ARABIA

My wife, Cathie, and I recently returned from 3-1/2 years at King Faisal Specialist Hospital in Riyadh, the capital of Saudi Arabia. I was Senior Photographer in the Photo-Graphix Department and Cathie was Nursing Supervisor in the Outpatient Clinics. Before leaving, we knew that KFSH was a 550-bed tertiary care hospital renowned for its care of patients with cancer, cardiovascular, and renal diseases, and that the hospital offered diagnostic and treatment facilities equal to those in the Western world. However, we were anxious to see what our living accommodations would be like, and how we would adapt to living and working in a country so different from our own.

As we flew into Riyadh, we knew immediately that this was going to be a totally different experience. The 747 came in over rocky, barren, flat terrain, and from the window of the plane, the ground resembled a moonscape. However, as we flew over the city, we saw expressways, shopping centers, residential areas with trees and shrubs, and modern hotels and office buildings.

Our house turned out to be much more spacious and better furnished than we had anticipated. Termed a "villa" by the Saudis, it was actually one side of a duplex and consisted of three stories with about 2800 square feet of living space. Furniture, appliances, cookware, linen, and even an initial supply of food were provided. Our villa was one of 16 residences in the compound, and families of six different nationalities were our neighbors. An eight-foot high wall surrounding the compound provided privacy and security. A swimming pool was in the compound and other easily accessible recreation facilities included tennis, squash, and racquetball courts, weight rooms, and aerobic classes.

The facilities at work also were a pleasant surprise. In my patient photography area were two Zeiss fundus cameras, two Zeiss slit-lamp cameras, and a Keeler specular unit. There also were a multitude of spare parts, bulbs, flash tubes, and complete back-up cameras. I saw fascinating pathology because, unfortunately, many patients waited far too long to have their eye diseases evaluated and treated.

English is the official language for conducting hospital business, and I needed only about 30 words of Arabic to perform photography on the Arabic-speaking patients. Fluorescein angiography was fully explained by a staff of Arabic-speaking ophthalmic assistants. Anyone wishing to learn more Arabic could attend a conversational Arabic course offered by the hospital.

Americans contemplating expatriate work in Saudi Arabia are often concerned about conforming to Saudi laws and customs. Islam is the formal foundation of the Saudi Arabian state and no distinction is made between secular and religious life. Saudi laws that are surprising to the expatriate include strictly enforced prohibitions against the consumption of alcohol, public entertainment, dancing, dating, and women driving. Although penalties can be severe for breaking the law, leading a "normal life" is possible for the discreet who keep a low profile.

Considering the harsh climate and many restrictions, why would anyone want to live and work in Saudi Arabia? First and foremost is the monetary advantage. Although salaries are comparable to those in the States, money earned is tax-free. Added to that is free housing, transportation, utilities, and medical care. Substantial savings are possible.

For those who love to travel, eight weeks paid vacation per year provides the opportunity to visit exotic destinations. Some memorable trips for us included trekking in Nepal, camping in Ngorongoro Crater in Tanzania, and sailing the Galapagos Islands off the coast of Ecuador.

Another cogent reason for working in Saudi Arabia is the desire for a change and the addition of completely new adventures in your life. It was very enriching to live in a foreign country and work in a hospital employing over 60 different nationalities. Experiences in Saudi Arabia definitely broadened both professional and personal horizons.

Donald W. Boyles, CRA

THANK YOU

Dear OPS Membership,

On behalf of the RIT community and the Biomedical Photographic Communications Program, I would like to extend my sincerest appreciation for receiving the complete set of the Journal of Ophthalmic Photography. This is a very welcome addition to the Biomedical Photographic Laboratory. OPS has been extremely generous in their continued support of education and educational programs that we have ongoing here at the School. It is your belief, and ours as well, that, with the OPS’s support and interest, we can further develop the relationship and viability of students entering the ophthalmic field. I have a sense that we are beginning to see this happen more and more.

As I mentioned, the journals will make a very welcome addition to the library which many students have access to. I look forward to an exciting future with all of the support that groups like yourself have lent to the program.

Again, my sincerest thanks and appreciation from the students.

Sincerely,

Michael R. Peres, Chairman
Biomedical Photographic Communications Program

IN MEMORIUM

OPS member Larry Seligman, died this past September. Larry was an ophthalmic photographer at the University of Illinois from 1976 to 1978, Louisiana State University from 1978 to 1988 and free lanced from 1988 until his death in September.

To quote one of his close friends, “Larry was a very honest and honorable person. In his professional life, he is a perfectionist. In his personal life, he is a character out of Tennessee Williams. I do not speak of him in the past, because that is not how I think of him. He is not replaceable.”

IN THE SPOTLIGHT

Denice Bartlett, CRA, COT, BOD Secretary, had knee surgery in November. Anyone who knows Denice is well aware that extensive surgery is the only way to keep the woman down! Since she will be off her feet for some time, I am sure she would appreciate any obnoxious correspondence you may wish to send! Her address during confinement, is: 899 Pearl Street, #18, Denver CO 80203.

Bruce Morris, F.O.P.S., Principal Ophthalmic Photographer at the University of California Medical Center at San Francisco for these many years is enjoying a one year leave of absence. Contrary to rumor, he is not circumnavigating Greenland in a sea kayak; instead, he has moved to the corporate world of Allergan Humphrey, manufacturer of microprocessor based ophthalmic diagnostic equipment. Bruce joins a team comprised of research and development, engineering and marketing experts working on the retinal image/ analyzer. He will coordinate the efforts of worldwide clinical sites where investigators are exploring the utility of the scanning beam fundus imager and application of digital image analysis.

T-SHIRTS AVAILABLE

For a limited time (until February 15) both “glow-in-the-dark” T-shirts and sweatshirts introduced at the Annual Meeting, highlighting the 20th Annual Meeting in New Orleans, will be available. For an order form or more information, please call John L. Johnson, FOIPS. All proceeds from the sale of the shirts will be donated to the OPS Educational Fund. (Caution: Fluorescence from the shirt will fog film if worn in the darkroom immediately after exposure to regular room light or daylight!)

PROFESSIONAL OPPORTUNITIES

Position Desired - Department Head or Senior Photographer: CRA recently returned from a 3-1/2 year assignment in Saudi Arabia. Nine years experience in ophthalmic photography with most recent position as Senior Photographer supervising a staff of four. Expertise includes FAs, Fundus, SL, Gonio, OR and hand held fundus photography. Participated as a certified photographer in two national ophthalmology studies. Contact: Don Boyles, 1723 East Clifton Rd., N.E., Atlanta, GA 30307, (404) 377-3178.

Ophthalmic Photographer: CRA or (soon to be) desired for shooting at various Southern California locations. LA based mobile service. Salary $30 - $40,000. Contact: Richard Morrone, Bio-Graph, PO Box 1240, Studio City, CA 91614. (818) 761-8108.

Ophthalmic Photographer: San Francisco Bay Area retina practice has an immediate opening for a full time ophthalmic photographer with darkroom experience. Full benefits. Salary commensurate with training and experience. Contact: Allen Z. Verne, MD, Bay Area Retina Associates, 491 30th St., Suite 102, Oakland, CA 94609. (415) 832-6554.

Ophthalmic Photographer: High volume general practice seeks individual experienced in FAs, Fundus photography, endothelial cell counts and scans. Please send resume to Miami Eye Center, 619 NW 12 Ave., Miami, FL 33136. Attn: Administrator.

Ophthalmic Photographers/Technicians - 24 & 40 Hr./Wk positions: Our 239 bed Medical Center is an acute care, full service facility serving the Vallejo community and regional rehab. ctre. for N. CA. Within this challenging environment you will be applying your knowledge of normal and abnormal ocular anatomy, physiology and pathology to the photographic techniques required for FAs and other external visual exams. Minimum 2 yrs. experience or 9 mos. on the job training with proven ability to perform all necessary...
In order to better meet the educational needs of the ophthalmic photographer, the OPS Board of Education has designed this survey to profile our membership. The results of this survey will be carefully considered in developing future educational programs. Each individual’s response is essential to reflect an accurate membership profile. We appreciate your participation. (Please circle your choices)

1. How long have you been an ophthalmic photographer?
   - < 1 yr.
   - 2-4 yrs.
   - 4-6 yrs.
   - 6-10 yrs.
   - > 10 yrs.

2. Before you became an ophthalmic photographer, was your background in ophthalmic technology or general photography?
   - other field

3. What best describes your workplace?
   - private office
   - multiple physician clinic
   - major medical center
   - independent photography service

4. Please mark ALL of the ophthalmic photography tasks you perform:
   - fundus photography
   - slit lamp biomicroscopy
   - specular micrography
   - external photography
   - videography
   - darkroom processing
   - copy work
   - digital imaging
   - corneography
   - computer slides
   - O.R. photography

5. Please indicate licensure and/or certification:
   - CRA
   - COA
   - COT
   - COMT
   - RBP
   - RN
   - MD
   - other

6. How frequently do you attend OPS educational programs?
   - yearly
   - every 2-3 years
   - every 3-4 years

7. Is your decision to attend meetings ever affected by their geographic location?
   - yes
   - no
   - If yes, please explain
   - Location suggestions

8. Is your decision to attend meetings ever affected by other issues?
   - yes
   - no
   - If yes, please explain

9. Do you plan to attend the OPS/AAO Annual meeting in:
   - 1990
   - 1991
   - 1992

10. What kind of courses would you like to see added to the OPS educational curriculum?

11. I would attend more educational meetings if...

Please mail your completed surveys to: Paula Morris, CRA
    3656 Pax Circle
    Salt Lake City, Utah 84124
procedures. Knowledge of Goldman Tangent Screen, Humphrey VFs and biometric measurements. Send resume to: Patricia McKeldin, Personnel Dept., 975 Sereno Dr., Vallejo, CA 94589. 707-648-6238. We are an EEO/AA employer. Minorities, women, handicapped and veterans are encouraged to apply. Kaiser Permanente.

**Certified Photographer/Technician:** The Dept. of Ophthalmology in the Ivey Institute of Ophthalmology requires a career oriented person for the position. Qualifications include graduate of a certified program or equivalent experience and continuing education. Responsibilities include FAs, fundus, SL photography and darkroom experience. VFs and electrophysiological testing, including ERG, EOG and VER. Excellent communication and interpersonal skills necessary. Victoria Hospital offers a comprehensive benefit package. Please submit a detailed resume and proof of certification to: Mrs. Sharon Hamill, Personnel Coordinator, Victoria Hospital, P.O. Box 5375, Station "A", London, Ontario, N6A 4G5.

**Certified Ophthalmic Technician:** State-of-the-art, solo practice limited to corneal and refractive surgery in ultra-modern office in suburban New York metropolitan area. $35,000 - $45,000, base salary plus travel expenses, medical coverage, profit sharing plan and many other fringe benefits for highly motivated individual. Refractometry, keratometry, patient work ups and scrubbing in surgery. Call Barbara at (201) 736-1313.
