Elementary Explorations

Apps that reinforce STEM learning by encouraging curiosity, observation skills, matching and memory. Discover science topics like space, dinosaurs, robots and more!

Recommended for grade K-5.

*Build and Play 3D* by Croco Studio. Create a variety of toys, vehicles and objects with colorful 3D pieces.

*Daisy the Dinosaur* by Hopscotch Technologies. Learn computer coding with this highly user-friendly app.

*Hopscotch* by Hopscotch Technologies. Building on skills learned in *Daisy*, program different creatures to move across the screen. Best for grades 3-5.

*GoSkyWatch Planetarium* by GoSoftWorks. Discover planets, stars and constellations just by pointing to the sky.

*National Geographic’s Ultimate Dinopedia* by National Geographic Society. Explore familiar favorites and discover new ones in this app packed with more than 700 dinosaurs.

*Our Amazing World: Owls* by Matchbook Digital LLC. Investigate the many species of owl and marvel at the vibrant images of these night-time predators.

*Sid’s Science Fair* by PBS Kids. Play with patterns and solve puzzles. Great for younger elementary kids.

*Toca Robot Lab* by Toca Boca AB. Create your very own robot using endless combinations of scrap pieces.
