

# DIAGNOSTIC TESTING FOR HIV: IMPLEMENTATION AND QUALITY ASSURANCE TIPS FOR THE CLINICAL LAB

November 16 | San Diego, CA  
December 7 | Houston, TX

## WHY ATTEND?

Are you wondering what new HIV tests are on the horizon that might change your practice and what best practices are for validating new tests?

Do you find it a challenge to interpret current HIV diagnostic tests?

Are your clients asking you about the best tests to use for their patients on PrEP or for the diagnosis of acute HIV?

## Low Registration Rates

Student | \$50

PASCV Member | \$75

Non-Member | \$175

### What Past Attendees are Saying

*Great content. I enjoyed the diverse of perspectives from the speakers.*

*The subject matter was good and informative.*

*Great mix of presentation and use of interactive polling.*

**4 Hours**

of P.A.C.E., CLS, and Florida  
Board of Clinical Laboratory  
Personnel Credit

## EXPERT SPEAKERS

**Sarah M. Wood**  
CHOP

**Neil Anderson**  
WUSTL

**Catherine Hogan**  
Stanford

**Ana Maria Cardenas**  
CHOP

**Omai Garner**  
UCLA

**Silvina Masciotra**  
CDC

**Renata Sanders**  
Johns Hopkins  
SOM

**Anthony Tran**  
DC Public Health  
Laboratory

HIV diagnostics are now a staple in the clinical laboratory. Rapid advances in technology have allowed for drastic improvements in the laboratory's ability to detect and diagnose HIV. As newer methodologies emerge, it is important for both clinical and public health laboratories to understand and incorporate these new applications and understand their limitations. This program will provide an in-depth overview of the current state of HIV diagnosis including the following topics: 1) Overview of current HIV tests and their use in the diagnostic algorithm plus discussion of current APhL reporting language document; 2) Challenging HIV diagnostic cases using the current algorithm; 3) Challenges of the current HIV diagnostic algorithm: Management of PrEP and diagnosis of acute HIV infection; 4) Four Letter Words in HIV Diagnostic Testing - CLIA-Waived Test Update: How do these assays fit into the current HIV diagnostic algorithm? AND... IQCP: Are your HIV serology tests in compliance?; 5) New HIV tests on the horizon and how they may affect the current algorithm; 6) Quality assurance programs for HIV diagnostic testing – issues surrounding laboratory validation of new HIV diagnostic tests.
