Diagnostic Update for Practitioners—Case Studies

Utilizing patient case studies and employing a case-based diagnostic and therapeutic approach, this presentation will highlight some interesting and challenging small-animal-medicine cases. The importance of the minimum database for evaluating such cases will be addressed. In addition, some exciting new innovative diagnostic tests will be discussed. Participants will review laboratory data including hematology, biochemical profiles, urinalyses, and other tests such as imaging studies. Treatment and monitoring protocols will be reviewed for each case.

Presented by Robert M. DuFort, DVM, DACVIM

Dr. DuFort received his DVM from the University of California, Davis, in 1980. He completed internships in small-animal medicine and surgery at Sacramento Animal Medical, followed by a small-animal internal medicine residency at Cornell University and residencies in clinical pathology, microbiology, and pathology at University of California, Davis. He is currently a senior internal medicine consultant with IDEXX.
