8. PURPOSE:

The Pinellas County Economic Development Authority (PCEDA) seeks statements of interest in response to this Request for Negotiations (RFN) to enter into negotiations for the outright purchase, lease/purchase, or other approach to sale of PCEDA-owned property identified in paragraph 2 (the "Property") in order to advance one or more Pinellas County development goals. These include increasing the tax base, generating income, reducing expenses, strengthening and diversifying the economy, creating/retaining value-added jobs within the County, and preserving/improving quality of life for County residents. The PCEDA will consider all qualified responses to this RFN, and evaluate each response based on the evaluation criteria established in paragraph 12 in accordance with the procedure set out herein. RESPONDERS ARE ADVISED THAT NO NEGOTIATIONS ARE FINAL, AND NO TERMS, PROVISIONS, OR UNDERSTANDINGS ARE BINDING AND ENFORCEABLE UNTIL APPROVED IN A WRITTEN CONTRACT AUTHORIZED BY THE BOARD OF COUNTY COMMISSIONERS, SITTING AS THE ECONOMIC DEVELOPMENT AUTHORITY.

9. BACKGROUND:

The Property is located at 11400 Belcher Rd. S (with a mailing and main building site address of 7887 Bryan Dairy Rd.), Largo, on the northwest corner of Bryan Dairy and Belcher Road and is known as the Young-Rainey Science, Technology and Research (STAR) Center.

The STAR Center is conveniently located at the western gateway of Florida's High-Tech Corridor and leases to a diverse group of technology companies and creates a synergistic work environment in the areas of analytic and environmental testing, custom hybrid micro-electronics, circuit design and manufacturing, and forensic sciences, etc. The Property is comprised of approximately 96-acres in unincorporated Pinellas County and is zoned as M-1 (Light Manufacturing) and includes a private road (114th Avenue N).

The Property, which was acquired by the PCEDA on August 27, 1999, currently operates as a manufacturing and technology campus that is managed and operated by Pinellas County's Real Estate Management (REM) Department on behalf of the PCEDA.

Chemical contamination (chlorinated solvents in the groundwater and arsenic contamination of the soil) under the STAR Center site exists. There are three primary sources of the chemical contamination:

- (1) Northeast Site
- (2) Wastewater Neutralization Area (WWNA)
- (3) Building 100

The contamination sources in the Northeast and WWNA areas have been removed and each site remediated. The contamination source at Building 100 is under the building, which makes source removal impossible. Containment and in-situ treatment are the best available options. Testing and administrative controls ensure there are no pathways to expose on-site personnel.

The chemical contamination at the Northeast site is due to buried chemical waste during the 1950's and 1960's. Arsenic contamination in the soil at the WWNA has been remediated. The chemical contamination under Building 100 was due to spillage and aged broken chemical drain pipes. Containment and remediation are in progress.

The contamination occurred during the ownership and operation of the U.S. Department of Energy (DOE). The DOE is responsible and liable for the contamination, remediation, and perpetual monitoring and reporting. The Florida Department of Environmental Protection (FDEP) is the regulatory agency that is monitoring the contamination, remediation, monitoring and reporting. An indemnification from the DOE to the site owner is in place to ensure containment and remediation continues in perpetuity or until FDEP issues the DOE for each of the three sites with a 'No Further Action' directive. The indemnification is transferrable with the sale of the Property. The DOE's Office of Legacy Management maintains key documents and links to the long-term surveillance and maintenance plan for the site. See <https://www.lm.doe.gov/Pinellas/Documents.aspx#rd> for facts and data.

There are three (3) unrecorded Declaration of Restrictive Covenants (DRCs) for each site: Northeast Site Solid Waste Management Unit; Wastewater Neutralization Area Solid Waste Management Unit; and, Building 100 Solid Waste Management Unit. The restrictive covenants include the preclusion of any residential component on the Property, the notification to FDEP before accessing groundwater for use or dewatering activities, and notification to FDEP prior to the altering/modifying the existing on-site storm water drainage system, swales or retention facilities. The DRCs will remain in place until FDEP issues the DOE a 'No Further Action' directive for all sites. Additionally, there exists a Memorandum of Agreement to Continuing Obligations to manage the implementation of the associated DRCs on the Property to restrict the use of surficial aquifer beneath the Property, to control the modification of existing Stormwater management facilities, and to govern excavation and construction in restricted areas.
