Cerebral Palsy

Proposed definition and classification of cerebral palsy. 

Assessment and Treatment of Children with Cerebral palsy. 

Changes in muscle activity in children with hemiplegic cerebral palsy while walking with and without ankle-foot orthoses. 

Pediatric Spasticity

Practice parameter: Pharmacologic treatment of spasticity in children and adolescents with cerebral palsy (an evidence-based review). 

Consensus on the appropriate use of intrathecal baclofen (ITB) therapy in pediatric spasticity. 

Botulinum Toxin A for nonambulatory children with cerebral palsy: A double blind randomized controlled trial. 
J pediatrics 2014;165:140-146.

Classification and definition of disorders causing hypertonia in childhood. 
Juvenile Idiopathic Arthritis

Juvenile idiopathic arthritis.

Pediatric Brain Injury / Concussion

Neuropharmacology in pediatric brain injury: A review.
PM&R 2010;2:1127-1140.

Concussion in the pediatric and adolescent population: “Different Population, Different Concerns”
PM&R 2011;3:S369-S379. Effects of concussion on the developing pediatric brain are different from the effects on the older brains. Research suggests that a youth athlete with a concussion should be managed more conservatively than older athletes because of longer recovery times and possible long-term effects on the developing brain and the rare but potentially catastrophic effects of premature return to play.

Pediatric Stroke

Effect of dynamic orthoses on gait: A retrospective control study in children with hemiplegia.

CRPS

Outcomes of children with complex regional pain syndrome after intensive inpatient rehabilitation.

Lumbar sympathetic blockade in children with complex regional pain syndromes: A double blind placebo-controlled crossover trial.

Noninvasive treatments for pediatric complex regional pain syndrome: a focused review.
Spina Bifida

**Sociodemographic attributes and spina bifida outcomes.**

**The National Spina Bifida Patient Registry: Profile of a large cohort of participants from the first 10 clinics.**

Brachioplexopathy

**Outcome in adolescence of brachial plexus birth palsy. 69 individuals re-examined after 10–20 years.**

**Evaluation of elbow flexion as a predictor of outcome in obstetrical brachial plexus palsy.**

Spinal Cord Injury

**Spinal cord injury in the pediatric population: a systematic review of the literature.**

**Spinal cord injury without radiologic abnormality in children: A systematic review and meta-analysis.**

Amputation

**Pediatric limb differences and amputations.**
Upper limb prosthesis use and abandonment: a survey of the last 25 years. 

DMD

Diagnosis and management of Duchenne muscular dystrophy, part 1: Diagnosis, and pharmacological and psychosocial management. 

Diagnosis and management of Duchenne muscular dystrophy, part 2: implementation of multidisciplinary care. 
Bushby K, Finkel R, Birnkrant DJ, et al. Lancet Neurol 2010;9(2):177-89. Expert consensus on management of DMD, this article provides a framework for provision of multidisciplinary care for this condition, including the importance of PM&R as part of a multidisciplinary team.

The 6-minute walk test and other clinical endpoints in duchenne muscular dystrophy: Reliability, concurrent validity, and minimal clinically important differences from a multicenter study. 

The cooperative international neuromuscular research group Duchenne natural history study: Glucocorticoid treatment preserves clinically meaningful functional milestones and reduces rate of disease progression as measured by manual muscle testing and other commonly used clinical trial outcome measures. 

SMA

Consensus statement for standard of care in spinal muscular atrophy.
