

PIMA Annual Meeting Highlights Polyiso Growth and Manufacturing Future

WASHINGTON, November 19, 2014 – At the end of October, member of the Polyisocyanurate Insulation Manufacturers Association (PIMA) gathered in Washington, DC, for the Association’s annual meeting. Attended by over 100 members—both polyiso manufacturers and suppliers to the industry—the two-day event featured an educational session which presented visionary perspectives from Washington insiders on issues impacting the industry and provided opportunities for PIMA members to appreciate their role in that vision.

During the annual meeting, members heard from:

- Hon. Cal Dooley, President and Chief Executive Officer, ACC, who discussed the broad contributions of the chemical and insulation sectors to global health and well being.
- Stephen Gold, President and CEO, MAPI, who offered insights and analysis regarding the vibrant nature of manufacturing.
- Jack Schenendorf, Of Counsel, Covington & Burling, LLP, who offered his expertise and insight regarding the state of the infrastructure in the United States and suggestions for initiatives to meet the growing demands on the country’s infrastructure.

“Our industry has had another great year, which is a testament to the efforts of all the people attending this meeting,” said Jim Whitton, Chairman, PIMA. “As a number of new market research reports highlight, the increase in demand worldwide for insulation and other energy efficient products will continue, and our industry will be here to provide the best product available.”

PIMA member Huntsman Corporation sponsored the Association’s annual outreach reception, which was held at the National Museum of Women in the Arts.

About PIMA

For over 25 years, the Polyisocyanurate Insulation Manufacturers Association (PIMA) has served as the unified voice of the rigid polyiso industry, proactively advocating for safe, cost-effective, sustainable and energy efficient construction. PIMA’s members, who first came together in 1987, include a synergistic partnership of polyiso manufacturers and industry suppliers. Polyiso is one of the nation’s most widely used and cost-effective insulation products available. To learn more, visit www.polyiso.org.
