## **PIMA and the Center Release 2012 I-Codes Design Guide**

*Washington, D.C. – December 18, 2012* – The Polyisocyanurate Insulation Manufacturers Association and the Center for Environmental Innovation in Roofing (Center) have released the ***Roof and Wall Thermal Design Guide: Applying the Prescriptive Insulation Standards of the 2012 I-Codes***.

The non-proprietary guide provides information regarding the prescriptive thermal value tables in the 2012 International Energy Conservation Code and the references to these tables in the 2012 International Green Construction Code. The guide translates this information into simple and straightforward roof and wall R-value tables covering the most common forms of commercial opaque roof and wall construction.

“This guide is informative and easy to use, underscoring the importance of applying the codes to building design and construction,” said Jared O. Blum, President PIMA. “We hope the building community will find this to be a useful tool.”

A copy of the design guide is available for free download at [www.polyiso.org](http://www.polyiso.org).

### **About The Center**

The Center for Environmental Innovation in Roofing is a not-for-profit 501(c)(6) organization whose mission is to promote the development and use of environmentally responsible, high performance roof systems and technologies. For more information visit, *visit [www.RoofingCenter.org](http://www.RoofingCenter.org)*.

### **About PIMA**

For over 25 years, the Polyisocyanurate Insulation Manufacturers Association (PIMA) has served as the unified voice of the rigid polyiso industry proactively advocating for safe, cost-effective, sustainable and energy-efficient construction. PIMA’s members, who first came together in 1987, include a synergistic partnership of polyiso manufacturers and industry suppliers. Polyiso is one of the Nation’s most widely used and cost-effective insulation products available. To learn more visit [www.polyiso.org](http://www.polyiso.org).
