GAF Becomes Manufacturing Member of Polyisocyanurate Insulation Manufacturers Association

Roofing manufacturer opened first polyiso plant in June 2012, additional facilities planned

BETHESDA, MD, September 25, 2012 –The Polyisocyanurate Insulation Manufacturers Association (PIMA) announced today that GAF has become a manufacturing member of the Association as a result of opening its first polyiso plant. GAF is North America’s largest roofing manufacturer.

GAF’s first ISO manufacturing facility, in Statesboro, Georgia, began shipping material in August of this year. GAF plans to open its next manufacturing facility for polyiso insulation in the third quarter of 2013 in Gainesville, TX.

“Energy efficiency, the lynch pin of polyiso products, continues to be a critical driver in the public policy and building design arenas, making this an opportune time for GAF to enter the polyiso market,” said Jared O. Blum, President of PIMA. “We look forward to GAF’s participation in the Association as we celebrate our 25th year.”

Polyiso is a closed-cell, rigid foam board insulation used primarily on the roofs and walls of offices, health facilities, warehouses, retail and industrial manufacturing facilities and educational institutions. Because of its high thermal performance, it is the product of choice for energy-aware homebuilders and consumers.

About GAF

Founded in 1886, GAF has become the largest roofing manufacturer in North America. The company’s products include a comprehensive portfolio of steep-slope and commercial roofing systems, which are supported by an extensive national network of factory-certified contractors. Its success is driven by its commitment to Advanced Quality, Industry Expertise, and Solutions Made Simple for contractors, specifiers, and property owners alike. In 2011, GAF was the first roofing manufacturer to offer a Lifetime limited warranty on all of its laminated shingles and, in 2012, it introduced the GAF Lifetime Roofing System. About PIMA

For over 25 years, the Polyisocyanurate Insulation Manufacturers Association (PIMA) has served as the unified voice of the rigid polyiso industry proactively advocating for safe, cost-effective, sustainable and energy efficient construction. PIMA’s members, who first came together in 1987, include a synergistic partnership of polyiso manufacturers and industry suppliers. Polyiso is one of the Nation’s most widely used and cost-effective insulation products available. To learn more visit www.polyiso.org.
