Polyiso Industry Reports 7.5% Increase in Product Shipments for 2021

Arlington, VA, April 7, 2022 – The Polyisocyanurate Insulation Manufacturers Association (PIMA) announces that for the year ending December 31, 2021, polyisocyanurate (polyiso) product shipments increased 7.5 percent year-over-year as measured in board feet. Over the past five years (2017-2021), total polyiso product shipments have increased by more than 22 percent.

“The growth in polyiso shipments tracks the upward trajectory of investments in more energy-efficient commercial and residential buildings,” said PIMA President Justin Koscher. “The public and private sectors are focused now more than ever on policies that reduce building energy use in new construction as well as in the existing building stock. This is creating more opportunities for the use of polyiso insulation in projects that result in significant energy savings, including retrofit projects like roof replacements.”

PIMA gathers shipment data for polyiso products produced in the United States and Canada by the participating manufacturing members of the Association. The shipment information is collected and reported in the aggregate by an independent third party, Association Research, Inc., and reflects products used for roofs, walls, cover boards and other applications.

About PIMA
For more than 30 years, the Polyisocyanurate Insulation Manufacturers Association (PIMA) has served as the voice of the rigid polyiso industry, proactively advocating for safe, cost-effective, sustainable, and energy-efficient construction. Organized in 1987, PIMA is an association of polyiso manufacturers and industry suppliers. Polyiso is one of North America’s most widely-used and cost-effective insulation products.
