PIMA Issues New and Updated Polyiso Technical Resources

Arlington, VA, August 8, 2022 – The Polyisocyanurate Insulation Manufacturers Association (PIMA) publishes technical and performance bulletins to increase the building industry’s understanding of polyiso insulation, its applications and its benefits. PIMA announced today that it has issued new technical and performance bulletins as well as updated versions of previously issued bulletins that include the following:

New Resources:

Updated Resources:
- Technical Bulletin 112, *Moisture Generated During Construction*, highlights how moisture generated during construction can affect the roof system and the construction practices that can be implemented to reduce problems associated with moisture in systems.

“PIMA strives to be a go-to resource for the roofing, building envelope and general construction industries for technical information on the performance of polyiso insulation products,” said PIMA Technical Director Marcin Pazera. “Maintaining a current library of bulletins is a key part of our strategy to serve the industry and its stakeholders.”

The more than 40 technical and performance bulletins published by PIMA can be found [here](#) and [here](#).

**About PIMA**
For more than 30 years, the Polyisocyanurate Insulation Manufacturers Association (PIMA) has served as the voice of the rigid polyiso industry, proactively advocating for safe, cost-effective, sustainable, and energy-efficient construction. Organized in 1987, PIMA is an association of polyiso manufacturers and
industry suppliers. Polyiso is one of North America’s most widely used and cost-effective insulation products. To learn more, visit www.polyiso.org.
