Maine Minimum Insulation Requirements for Low-Slope Commercial Roofing

The applicable building energy code that determines the minimum insulation requirements for commercial roofs with insulation entirely above the deck in Maine is the Maine Uniform Building Code (based on the 2015 International Energy Conservation Code). This code is effective July 1, 2021. The minimum insulation requirements apply both to new construction and roof replacements on existing buildings.

Note that local jurisdictions may adopt the 2021 International Energy Conversation Code. While the insulation requirements applicable to commercial roofs are equivalent under the 2015 and 2021 versions of the code, other requirements may vary. Please consult your local jurisdiction to determine which code is applicable.

Minimum R-value Requirements for Insulation Entirely Above the Roof Deck

Minimum R-values:
- Climate Zone 7: R-35ci
- Climate Zone 6: R-30ci

Notes
- **About R-value:** R-value is a measurement of a material’s ability to resist heat flow. The higher the R-value, the greater the insulating power. Installers should consult data sheets provided by polyiso manufacturers for information on product-specific R-values.
- **Code Compliance:** The International Energy Conservation Code recognizes ASHRAE 90.1 as an alternate compliance option for both new construction and existing buildings.

- U.S. Department of Energy
Option #1 - R-30ci Roof Assembly

Two layers of 2.6” polyiso  R-30.0

Option #2 - R-30ci Roof Assembly

Two layers of 2.4” polyiso  R-27.6
0.5” HD Polyiso Cover Board  R-2.5
Total  R-30.1

Option #1 - R-35ci Roof Assembly

Two layers of 3.1” polyiso  R-36.0
About PIMA

Since 1987, PIMA has served as the voice of the North American rigid polyiso insulation industry. PIMA is a leading advocate for safe, cost-effective, sustainable, and energy-efficient construction. The Association is comprised of polyiso manufacturers and industry suppliers, and represents the public policy interests of its membership at the local, national, and international levels to advance high-performance building practices.

About Polyiso Insulation

Polyiso is a rigid foam insulation used in more than 70% of commercial roof construction and offers a continuous insulation solution for commercial and residential wall assemblies. As one of North America’s most widely used and readily available building products, polyiso is a cost-effective insulation option for reducing building energy use and improving the overall service-life of roofs and walls.
