

AOP WEBINAR

Is there a role for the adverse outcome pathway framework in **radiological protection**?

Tuesday
September 11, 2018
9:00-11:00 AM EDT

Register here: <https://bit.ly/2Lowh4y>

Tune in and learn about the Adverse Outcome Pathway (AOP) Framework: a standard means of identifying early molecular events associated with an adverse outcome.

Experts from the OECD Extended Advisory Group for Molecular Screening and Toxicogenomics (EAGST) committee will share knowledge including:

- An introduction to the AOP framework and its use
- Highlights of improved risk assessment in the chemical field
- An example specific to ionizing radiation
- Identification of the benefits specific to the radiological protection community
