Neurosurgical Associates, P.C.
is pleased to welcome

Avery Buchholz, M.D., MPH

Dr. Buchholz grew up in rural Wisconsin prior to attending The Citadel in Charleston SC. After graduating summa cum laude, he returned to the University of Wisconsin for medical school where he earned both a Doctor of Medicine and a Masters in Public Health. He then completed a neurological surgery residency at the Medical University of South Carolina. He earned the Intern of the Year Award in his first year of training and was one of the most outstanding residents in neurosurgery throughout.

Dr. Buchholz was strongly interested in spinal disorders throughout his residency, focusing his research and clinical training on minimally invasive spine surgery and advancing those techniques. He had numerous publications and presentations on this topic throughout residency, winning awards for both. After training at MUSC, he completed a complex spine surgery fellowship at the University of Virginia working with world-renowned surgeons Dr. Christopher Shaffrey and Dr. Justin Smith. While at UVA he also completed an AO spine fellowship, winning the national award for best clinical research.

He treats all spine disorders with particular expertise in spinal deformity, adult scoliosis, complex spine surgery, tumors of the spine, and minimally invasive surgeries.

Please join us in welcoming Dr. Avery Buchholz to the Richmond Academy of Medicine
