This CKD: Identification and Action Plan Card can be used as a quick reference to:

1. Classify stages of CKD
2. Understand the actions recommended
   (Please note: the actions associated with earlier stages are needed regardless of the individual patient’s stage at presentation)
3. Suggest appropriate time frames for consult or referral to a nephrologist
4. Identify individuals at high risk for developing CKD and indications of kidney damage
5. Advise of progression risk factors
6. Alert to potential complications
7. Provide concise guidelines for management of patients with advanced CKD

See Executive Summary of RPA Clinical Guideline #3 in Physician Education Maternal Section of toolkit or refer to www.renalmd.org for full guidelines.
