Satellite Symposia are approved by the RPA Education Committee; however, they are not part of the official RPA Annual Meeting.

Friday, March 29, 2019
6:30 am – 8:00 am
Breakfast Symposium hosted by Fresenius Medical Care

**Title:** Managing Fluid in Hemodialysis with Crit-Line® Technology

**Speakers:**
Daniel W. Coyne, MD, Professor of Medicine, Division of Nephrology, Washington University School of Medicine
Lisa Pacelli, RN, Regional Director, Clinical Initiatives, Renal Research Institute

**Summary:** Attendees will learn about current clinical findings regarding blood volume and improved outcomes. The speakers will share case studies of Crit-Line’s data and its impact on patient treatment.

Friday, March 29, 2019
12:30 pm – 2:30 pm
Lunch Symposium hosted by OPKO Renal

**Title:** Rationale for Raising Current Clinical Practice Guideline Target for Serum 25-Hydroxyvitamin D in Chronic Kidney Disease.

**Speaker:** Dr. Stuart Sprague, Professor of Medicine, University of Chicago and Chief of Nephrology, North Shore University Health System, Chicago, IL

**Summary:** ERC therapy produced exposure-dependent reductions in plasma iPTH and bone turnover markers only when mean serum total 25-hydroxyvitamin D reached at least 50.8 ng/mL, indicating that current targets for vitamin D repletion therapy in CKD are too low. Gradual elevation of mean serum 25-hydroxyvitamin D to 92.5 ng/mL was not associated with significant adverse changes in safety parameters.

Saturday, March 30, 2019
6:30 am – 8:30 am
Breakfast Symposium hosted by Fresenius Medical Care

**Title:** 2008T BlueStar Hemodialysis Machine: Advancing Care with a Next Generation Dialysis Delivery System

**Speaker:** Michael Singer, MBA, Group Vice President, Product Marketing Machines, Renal Technologies Group, Fresenius Medical Care North America

**Summary:** Attendees will learn about the 2008T BlueStar hemodialysis machine featuring 30+ enhancements; the latest technology built in Fresenius’s proven, feature-rich platform and how it is designed to provide simpler operation and maintenance with greater control, labor and cost savings, enhanced data stream, plus SLED and Low Volume treatment options.
Saturday, March 30, 2019
12:30 pm – 2:30 pm
Lunch Symposium hosted by Fresenius Medical Care

Title: Managing Phosphorus with Velphoro: Proven Results in Clinical and Real-World Settings
Speaker: Dr. Stuart Sprague, Professor of Medicine, University of Chicago and Chief of Nephrology, North Shore University Health System, Chicago, IL

Summary: Attendees will be presented strategies for managing patients on dialysis with hyperphosphatemia; A different approach to phosphorus management through Velphoro (sucroferric oxyhydroxide); and more about a Velphoro clinical study and real-world results.
