

AWWA's Water Equation provides academic and operator scholarships, student programs, and supports an amazing volunteer program, Community Engineering Corps.

In 2018, the Water Equation raised \$49,000 for the Wolman and Larson Scholarships, provided \$15,000 in programming funding for students and young professionals, and supported the Community Engineering Corps with \$65,000 in funds for volunteer training and placement for domestic water infrastructure projects.

The Association and its Sections partner to invest in the future of water and the industry's workforce. Together, WE will fund the Future of Water.

For stories about the impact being made through our scholarships, programming, and Community Engineering Corp fundraising please see:

awwa.org/we

The Community Engineering Corps[®] is an alliance between AWWA, American Society of Civil Engineers, and Engineers Without Borders-USA to provide technical expertise to underserved US communities with infrastructure needs.

Your support for Community Engineering Corps helps to send volunteers with the right skills to local communities to evaluate water infrastructure and engineer future improvements.

In 2018, \$65,000 in funds were contributed to Community Engineering Corps for volunteer training and placement for domestic water infrastructure projects.
