

**Full Funding for Reserve Component Full-time Support Personnel
(RC Funding & Organization)
Resolution 19-22**

WHEREAS, the Reserve Components (RC) are an integral part of the Total Force, having become an “operational” force continuously being utilized to serve alongside the Active Component force during ongoing global operations; and

WHEREAS, the RC performs a vital national security role that requires adequate Full-Time Support (FTS) personnel to provide day-to-day operational support of units; and

WHEREAS, Congress has recognized the importance of full-time manning, which includes Active Guard and Reserve (AGR) personnel, as well as military technicians (MT) for training, readiness and performance of the RC, particularly during times of increased operational tempo; and

WHEREAS, FTS funding shortfalls have caused undue stress on the force and have degraded the ability of the RC to transition to an operational reserve; and

WHEREAS, policy changes associated with pre-mob training and force generation readiness timelines have further strained FTS resources;

NOW, THEREFORE, BE IT RESOLVED that ROA chartered by Congress, urge the Congress to appropriate funds adequate to pay for all authorized Reserve Component Full-Time Support, and exempt Reserve Component military technicians from future furloughs.

Renewed: 29 Sept 2019 (Res 16-15), 14 Sept 2016 and 10 Aug 2013

Adopted by the National Convention 10 Feb 2010
