The University Hospital Bonn is a maximum care hospital with 1,300 beds. Our currently more than 8,000 employees perform tasks in research, teaching and patient care, including high-performance medicine, as well as in public health at the highest level. Interested applicants are offered a broad spectrum of employment opportunities in a wide range of areas.

The Institute for Medical Humanities of the University Hospital Bonn invites applications for

**a research associate (m/f/d).**

The position is part-time (65% - E 13 TV-L) and limited to four years. This temporary position is available from 1 July 2023 (negotiable) until 30 June 2027.

The medical-historical and -ethical project "The hidden, suspicious, mutable gender. Shame and Vigilance in the Early Modern Period" under the direction of Prof. Dr. Dr. Mariacarla Gadebusch Bondio and Dr. Brendan Röder is part of the Collaborative Research Center (CRC/SFB) 1369 "Cultures of Vigilance: Transformations - Spaces - Techniques", which was established at the Ludwig-Maximilians-University Munich on July 1, 2019 and which second funding phase was just approved by the DFG. The CRC includes historical studies, ethnology, turkology, Japanese studies, criminology, history of law and medicine, German, English and Italian studies. It covers different areas from the Assyrian Empire to the present. Within this interdisciplinary framework, the CRC examines the historical and cultural foundations of vigilance, which refers to a linking of individual attentiveness to goals set by others.

The project explores the early modern tension of shame and vigilance with regard to theories and practices of gender normalization. In doing so, the inspection and recording of genitalia will be reconstructed and examined for their coupling with the overarching goals of determining gender and maintaining gender order in the face of their latent endangerment. Medical debates about the non-normative or metamorphosing genitalia will be examined in their epistemic-normative and legal-practical-situational implications.

**You have:**
- completed studies (M.A.) with a focus on the history of science (esp. history of medicine) and / or philosophy of early modern times
- a very good knowledge of Latin and Early Modern German
- good knowledge of English is desirable due to the international character of the CRC
- interest in the topics of the project / the CRC
- interest in interdisciplinary cooperation within the framework of the CRC

**What we expect:**
- Research work within the framework of the CRC project with the possibility of qualification or further qualification eine Promotion ist in diesem Rahmen möglich
- Collaboration on project-related publications
- Collaboration in the organization of events within the framework of the project
- Participation in and contribution to events of the Collaborative Research Center and the integrated Research Training Group
- committed participation, enthusiasm, ability to cooperate and work in a team
- presence in Bonn and participation in the partly virtual events of the CRC in Munich

**We offer:**
- the opportunity to work at two excellent university locations
- an interdisciplinary research and teaching environment at the interface between medicine, humanities and social sciences
- an important institute library in the field of history, theory and ethics of medicine
- remuneration according to TV-L (EG 13) with all benefits of public service
Documents to be submitted:
- application letter (letter of motivation)
- curriculum vitae
- Qualification / degree certificates
- Names and contact details of two referees
- Proof of scientific activities (if already available): participation in conferences, publications, list of courses taught, etc.

Applicants with disabilities who possess essentially equal qualifications will be given preference. The application of women is encouraged.

Your main workplace will be at the Institute for Medical Humanities at the University Hospital Bonn; mobility as well as the willingness to participate in events taking place in Munich and to use the working facilities there are expected.
