Custom content pages allow you to provide your shipping and compliance requirements and other documents to your partners. Additionally, they serve to organize information in an effort to assist partners in finding information easily. Suggestions include creating different pages for each supplier type (e.g., apparel vs. electronics), commerce channel (e.g., domestic vs. international; stores vs. e-commerce), or division (e.g., "X" stores vs. "Y" stores). The "Resource Manager" allows unlimited file storage.

[Black Hanger Initiative](#)

Demo Stores is transitioning from clear hangers to black matte hangers. Suppliers should begin applying the new hangers for deliveries this fall, adhering to a conversion deadline of 1/1/12.

Black matte hangers are a positive move for our environment and support our sustainability efforts.

Additionally, Demo Stores will be requiring Secure Over Hanger (SOH) sizers for all hanging garments in merchandise categories being converted to black matte hangers.

Please communicate the information about this initiative to the applicable parties in your organization so we can ensure a smooth transition takes place.

Thank you for your ongoing support.

Subject: Packing List Requirements

We'd like to gather information from our suppliers about their capabilities to provide a replacement ASN in lieu of paper packing lists. Should a sufficient number of suppliers respond positively to this request, Demo Stores will begin exempting suppliers confirming this capability from providing paper packing lists with their shipments.

Forum Boards are also available, which can be used to quickly answer questions partners may pose regarding requirements or to allow partners to pose questions to their peers regarding solutions that will help them meet expectations. Partners in your group can also subscribe to forum boards or particular threads to receive instant notifications of postings.
