

STANDARDS AND INDICATORS FOR IDENTIFYING AND STRENGTHENING PARTNERSHIPS

RATIONALE

Injury and violence prevention activities extend across a wide range of topics, mechanisms of injury, risk and protective factors, behaviors, populations, and social determinants of health. No single organization can be expected to address these alone; partnerships are essential for any trauma center-based IVP program.

STANDARD

The program identifies and strengthens relationships at the community, local, state, regional, and national levels that amplify the program’s impact and contribute to coordinated, effective injury and violence prevention efforts.

INDICATORS

Indicators of Partnerships Standard		Core Model Program Indicators	Enhanced Model Program Indicators
P-1	The program <i>strengthens relationships with partners</i> to advance IVP, including data partners.	x	x
P-2	The program <i>uses a systematic process</i> to identify, develop, and track collaborative relationships with current and new partners to advance IVP.		x
P-3	The program <i>facilitates the connections of partners to one another</i> to support IVP program activities and/or objectives (e.g., implement and evaluate interventions, share data, increase awareness).		x
P-4	The program <i>participates in</i> broader IVP networks (e.g., state planning efforts or coalitions, regional trauma advisory committees, HHS regional networks, juvenile court systems and national organizations such as Safe Kids Worldwide, Safe States Alliance, and CDC).	x	

Indicators of Partnerships Standard	Core Model Program Indicators	Enhanced Model Program Indicators
P-5 The program participates in <i>and contributes</i> to broader, systems approaches to IVP (e.g., state planning efforts or coalitions; regional trauma advisory committees; HHS regional networks; juvenile court systems; housing, transportation, and education agencies; and national organizations such as Safe Kids Worldwide, Safe States Alliance, and CDC).		x
P-6 The program participates and has a productive, collaborative relationship with local, state, and/or national <i>public health agencies</i> involved directly or indirectly in IVP (e.g., chronic disease prevention, maternal and child health, transportation).	x	x
P-7 The program collaborates with external partners and community members to implement multi-level interventions that are aligned with broader IVP efforts and plans.	x	x
P-8 The program provides a report to the community annually that includes the scope and status of its partnerships.	x	x
