What is the WHO definition of health?

Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity. The bibliographic citation for this definition is: Preamble to the Constitution of WHO as adopted by the International Health Conference, New York, 19 June - 22 July 1946; signed on 22 July 1946 by the representatives of 61 States (Official Records of WHO, no. 2, p. 100) and entered into force on 7 April 1948. The definition has not been amended since 1948.

Publications: where can I find information on WHO publications?

The navigation bar at the top of the WHO web site has a “Publications” link that leads to information about WHO publications. This includes access to the online book shop, news, subscription information, and information about major publications and journals.

Publications

Can I link to the WHO web site from my web site? How do I request a link from the WHO web site to my site?

Potentially any external web site may add a hyperlink to the WHO web site without requesting permission. However this use must not infringe WHO's intellectual property rights, in particular relating to its name, emblem, copyright or authors' rights. WHO does not normally provide links to external web sites unless there is a clear association with WHO's activities. For more details, please read the Permissions and licensing pages.
