Have you been looking for an opportunity to help shape the future of the Low Country District of the Water Environment Association? If so, now is your chance to stand up and throw your hat in the ring for the upcoming available officer positions. The District is looking for nominations for 1st Vice Chair and 2nd Vice Chair, as well as Secretary. The Vice Chair positions move up the ranks each year and are designed to allow ample time to learn the ropes before stepping into the Chair position. Serving the association is a very rewarding endeavor that will bring you both personal and professional contact with your peers in Berkeley, Charleston, and Dorchester Counties, as well as across the great state of South Carolina!

On September 19th, Boeing opened its doors to the LCDWEA for a tour of their wastewater treatment facility designed to treat the wash down water from the paint building at the manufacturing facility. Several members were in attendance and were treated to an exceptional tour that included a look into the methods of production and transportation of parts from all over the world to Charleston’s assembly facility. This was quite the fascinating event centered around an Industry leader in the manufacturing of such magnificent aircraft.
Many thanks to everyone for making this year’s Oyster Roast a great success! We were blessed with a confirmed turnout of 60 people that signed in plus a few more that I think missed the sheets. AJ did a great job presiding over the meeting and the awards presentation! Becky and Lisa held down the front sign-in table and greeted all our members and guests with a warm welcome! Many thanks for that, and for selling the 50/50 raffle tickets. Also thanks to Tommy for picking up the raffle items, they definitely added value to the evening. I received many complements on the oysters and on the live music. This Low County District event continues to be enjoyed by all, including our State Officers. Once again, we received compliments from the State on this event, as well as the interesting tours and training we do throughout the year.

Congratulations to this years Award Winners:

Maintenance Technician: Ken Johnson, Kiawah Island Utility, Inc.

Safety: Tommy Bishop, Charleston Water System

Young Professional: Kevin Kopf, Charleston Water System

Wastewater Operator: Larry Hagan, North Charleston Sewer District
Evening Harbor Cruise
