The Water Environment Association of South Carolina (WEASC), and the South Carolina Section of the American Water Works Association (SCAWWA), are together the South Carolina Water Associations. We are a not-for-profit, technical and educational organization representing water professionals in South Carolina. Our members are a community of professionals who protect our state’s water environment and drinking water so this most precious resource can be preserved for generations to come. We are water distribution, collection and treatment professionals, engineers, regulators, and product suppliers.

Our mission is to provide solutions to protect, enhance, and effectively manage our state’s water resources, as well as deliver quality services to advance the water environment profession.

**MEMBERSHIP BENEFITS**

- Annual Subscription to the *Journal*, the official publication of the WEASC and SCAWWA
- Access to continuing education opportunities and scholarships
- Reduced registration rates to workshops and conferences
- Local and statewide professional networking events
