

Bluebeam Revu Intro - Explore Our Training Series with the Experts

Troy DeGroot
Instructor

Course Description:

***Whether you're new to Bluebeam or looking to sharpen your skills, this free launch session is the perfect starting point.**

Join us for a high-level overview of Bluebeam Revu software, one of the fastest-growing platforms in the AEC industry with nearly 4 million users worldwide.

You'll get a firsthand walkthrough of the upcoming course lineup, led by globally recognized Bluebeam Certified Instructor Troy DeGroot from uchapter2.com. Each course will be previewed with clear learning objectives so you know exactly which sessions fit your role, skill level, and daily workflow.

This is also your chance to ask questions, especially the ones our partners hear most, so you can register with clarity and confidence. Whether you sign up today or in the future, our goal is to be your go-to resource for all things Bluebeam.

Refund Policy

We value your commitment to learning and growth at UChapter2, and we are dedicated to delivering high-quality training that supports your professional goals. To help you plan confidently, please review our refund policy:

All training course sales are final. However, we do understand that unexpected situations can occur. For that reason, cancellations made at least 48 hours prior to the class start time are eligible for a refund, less any applicable processing fees.

Due to the resources involved in preparing our courses, cancellations made less than 48 hours before the class start time are not eligible for refunds.

Student substitutions will not be allowed less than 48 hours before the class start time.

Note: Unless otherwise stated, every person able to see, hear, and observe the virtual course sessions must be a paid participant. Non-compliance of this requirement will result in removal from the course. Refunds will not be issued to students who are removed from the course for non-compliance of this requirement.

Thank you for understanding our policy, which helps us maintain the quality of our training programs. If you have any questions or unique circumstances, please reach out to us at Troy.DeGroot@UChapter2.com. We're here to support your learning journey.

Course Requirements (Technology & Participation)

Please ensure you meet the following requirements:

- Please go to the Revu > About menu in the upper left corner of the Bluebeam interface. You're required to have Version 2018 or newer for our Bluebeam courses. If this same window says Unassigned at the top, **your IT department needs to assign you a license so you can login and use Bluebeam software. Make sure this is complete prior to class start time.**
- If you need to purchase a Bluebeam license, use [my referral link](#). Please allow a few days for the delivery and installation before class starts, this is not a last minute thing.
- Attendance via tablet or phone is not recommended. You should have a mouse with a scroll wheel when attending this class. In Bluebeam there are several right-click shortcuts, and the wheel will help you zoom in/out on documents.
- 2-screen computer set-up is recommended. This will allow you to watch the instructor on one screen while practicing on the other.

Construction Estimating Principles and Application

Troy DeGroot
Instructor

Course Description:

***Bluebeam will be used in the delivery of this course, but it is not Bluebeam Training.**

****Construction Estimating Principles and Application (4 Hours)****

This half-day virtual training—crafted by the industry experts at UChapter2—is built for estimators who want to sharpen their approach and gain a competitive edge. The course encourages attendees to ask the critical question: “How can we approach this project differently than our competition?”

****Viewpoint 1 – The Estimating Principles Behind Every Bid:****

This open-forum discussion, led by a panel of experienced estimators, explores advanced concepts and current industry models. Participants will examine their own processes through the lens of modern estimating principles.

Learning Objectives:

- Cost/Price analysis
- Pricing project constraints
- How to build flexibility into your system
- Optimum time to complete
- Escalation
- Managing risk within the estimate
- Danger zones to avoid

****Viewpoint 2 – How Technology Can Produce Faster, More Accurate Estimates:****

In today’s visual-first world, simply showing your understanding of a project can help win the work. This portion of the class demonstrates how digital tools—particularly Bluebeam Revu—can replace highlighters, rulers, and calculators with clear, repeatable workflows. The result? Estimates that are consistent, predictable, and fast, regardless of who’s doing the work. While Bluebeam Revu software may be referenced during the session, this is not a pics and clicks tutorial, it’s a deep dive into the mindset and methodology of successful estimating.

Learning Objectives:

- Working with PDF drawings
- Calibrating drawings
- Measurement tools
- Custom measurement tools
- Displaying and exporting data

Reading Construction Documents

Course Description:

Troy DeGroot
Instructor

***Bluebeam will be used in the delivery of this course, but it is not Bluebeam Training.**

***Reading Construction Documents (6 Hours)**

This two-part online course—developed by the certified instructors at UChapter2—is ideal for entry-level architectural or engineering designers, apprentices, tradespersons, project coordinators, estimators, specialty sales reps, or anyone in career transition looking for a practical refresher.

Whether you're on the jobsite or in the office, it's a solid first step toward better project collaboration.

Designed to quickly build confidence, this course covers the fundamentals of how to read and understand construction documents. From identifying title block information to reviewing floor plans, elevations, and combing through specification sections, participants will learn how to navigate a full set of drawings and interpret material and construction requirements with clarity. We will use Bluebeam software in the course delivery, but this is not Bluebeam functionality training.

Learning Objectives:

1. Introduction to Construction Documents
2. Understanding Industry Document Standards
3. Drawing Navigation
4. The Importance of Specialty Plans
