Thursday, June 7 – Friday, June 8, 2018 • Anaheim, CA

The Business of Structural Engineering

An intensive workshop for structural engineering firm leaders & project managers

Advance the leadership potential of your best and brightest!

Earn 7.5 PDHs!
The Business of Structural Engineering Workshop

**Real-World Skills … Strategic Insights … Best Practices for Success**

Managing your structural engineering business for success requires technical know-how coupled with a broad awareness of today’s best business practices.

Firm managers must know the rules of finance and how they work in the real world, and the ins and outs of managing people, risk and resources, including:

- Understanding Duty to Defend and How to Protect Your Firm
- Avoiding Getting Burned by Electronic Communications
- Driving Financial Performance Through Metrics
- Navigating Your Way Through High Risk Projects
- Transitioning Project Managers to Firm Leaders

**Contemporary Best Practices and Critical Operational Management Methods**

This workshop highlights strategies for a wide array of critical business topics that will keep your business thriving despite a churning business environment.

Attendees will learn specific skills and techniques to help them manage change and build success in finance, leadership development, contracts and risk. This workshop is presented by the Council of American Structural Engineers (CASE), the leading provider of business practice and risk management information for structural engineering firms. Structural engineering firms are not simply run on technical know-how – you can’t be successful without understanding the basics of the business world. *The Business of Structural Engineering Workshop* will share challenges facing today’s structural engineering firms and how to address them.

**What Will Attendees Learn?**

Attendees will leave the event with best practices to assist your firm in:

- Reducing claims
- Increasing profitability
- Improving quality
- Enhancing management practices
“It is the business aspect of this profession that can be the most challenging, especially to the younger members of our firms. This workshop provides us with great insight into what other firms do in this business to survive.”

Brent Wright, Wright Engineering, LLC

“As engineers we all take pride in our technical work and invest in growing our technical capability. The Business of Structural Engineering seminar is an opportunity to think about the business and managing our exposure to risk.”

Stacy Bartoletti, Degenkolb Engineers
