The Steering Committee and Advisory Board of the Society for the Exploration of Psychotherapy Integration (SEPI) are happy to welcome you to our 22nd annual conference. Ours is a small interest group that began with a handful of members. We have grown into a truly international organization. At previous meetings, we have had people from North America, South America, Europe, Asia, and Australia attend and contribute. At this meeting there will be many familiar faces. We are particularly happy to see many new colleagues, and proud that this meeting will host a large number of student presenters. For the new attendees, we encourage you to seek out and speak to any participants whose work is of interest to you. We think that you will find this to be among the most open, receptive, and non-competitive meetings that you are likely to attend. We also would like to express particular appreciation, to all those who have contributed to the meeting, including Zoltan Gross, the Local Arrangements Chair and Sandra Paivio and Josee Jarry, the Program Chairs. Welcome to the meeting, enjoy yourself, and learn.
