

SER BUSINESS MEMBERSHIP

INCREASE YOUR VISIBILITY IN THE ECOLOGICAL RESTORATION FIELD WITH A BUSINESS MEMBERSHIP

Founded in 1988, SER is a network of restoration practitioners, academics, professionals from the corporate sector and public agencies, conservation groups, university research departments, and environmental consulting firms. SER's regional chapters, student groups, and network of over 2,800 members connects your business to experts, projects, and cutting edge research across the globe.

FIND THE BEST MEMBERSHIP TO FIT YOUR NEEDS

STANDARD ORGANIZATIONAL

This level is geared to nonprofits and academic departments who would like consolidated billing and a cost savings over individual memberships. This level does not include SER's member cross promotion benefits.

Become a **business member** to promote your work, elevate your employees, and demonstrate your commitment to high quality restoration practices:

STANDARD BUSINESS

This group level is for institutions of any size interested in creating opportunities for up to 8 staff members to engage in all of SER's professional development and networking opportunities.

BUSINESS FLEX

This level is designed for larger institutions interested in connecting up to 20 staff with SER's resources, with the flexibility to include certification registrations.

SER supports the ecological restoration field by promoting a global restoration policy agenda, providing networking opportunities, sharing research and best practices information, and credentialing practitioners.

CERP is the world's preeminent certification program for restorationists. Certification encourages a high professional standard at every stage of the restoration process.

Started in 1993, Restoration Ecology is the leading international peer-reviewed journal for restoration ecology research.

The RRC is a crowd-sourced database with thousands of restoration resources and projects from around the world.
