

SES - The Society for Standards Professionals

presents the following event
in conjunction with the 68th Annual SES Conference

Tuesday, August 6, 2019

1:00 p.m. – 5:00 p.m.

NextGen Standards Professional Workshop

Format

An interactive workshop with introductory presentations and group discussions.

Description

It is important that to raise awareness via different platforms about standards, professionals involved in standards, and the impact they have in improving the quality of our life. SES is organizing a dynamic workshop focusing on the future of standards and the Next Generation standardization professionals. This workshop will highlight current education initiatives with regards to standards and conformity assessment, explore standards development process in a digital age, review current set of skills and credentials and explore future expected knowledge set for professionals involved in standards work, and explain the importance of having young professionals involved to expand engagement and awareness of standards.

Top three reasons to attend this workshop:

- Be empowered to take an initiative towards expanding the awareness of the work you do
- Network, collaborate, and share your knowledge with other standards professionals
- Learn to lead the digital transformation process for your organization for standards development

Agenda

- Moderator Introduction and Workshop Kickoff
- Panel presentations on developing NextGen standardization professional
- Interactive Session
- Conclusions & Takeaways

Who Should Attend?

Standards professionals, corporate managers, engineers, government and public administration staff, standards developing organization staff and volunteers, consumers, and faculty and students, who want discuss needs for developing our next generation of standards professionals.

There is no fee to attend this Workshop for attendees of the 68th Annual SES Conference but registration is required.
