NEWS RELEASE

SES Announces Launch of the New SES Website

FOR IMMEDIATE RELEASE

November 10, 2019

SES - The Society for Standards Professionals is proud to announce the launch of the recently redesigned SES website. The website is a culmination of a year-long project and coordinated effort of the SES Board of Directors including all committees and officers to review, update, and replace SES pages and content to ensure a cohesive, modern, and easy to use platform for SES members and standardization stakeholders.

“We are thrilled to announce the launch of SES’ newly designed website. We hope that our members and customers will find it easier to access information and learn about SES’ programs, events, and opportunities for the standardization community,” stated Mili Washington, SES President.

To review the newly redesigned website, visit www.ses-standards.org.

About SES

SES - The Society for Standards Professionals was founded in 1947 as the Standards Engineering Society, a not-for-profit professional membership society dedicated to furthering the knowledge and use of standards and standardization. SES is unique in that it is the only organization in North America committed exclusively to this effort. SES provides a neutral networking forum where standards users and developers can come together to address mutual issues, opportunities, and interests in ways that work to the benefit of everyone involved with, or affected by, standards. The Society’s worldwide membership includes standards developers, users, managers, and information specialists from industry, government, standards developing organizations, trade associations, and academia. SES is the member body for the United States and Canada in the International Federation of Standards Users (IFAN) and accredited by the American National Standards Institute.
