PROGRAM OBJECTIVES

At the conclusion of this activity, learners will be able to:

- Discuss techniques and best practices for the following surgeries:
 1. Oncoplastic surgery for the reconstruction of a breast following partial removal of the breast for breast cancer
 2. Removal of older round breast implants and adjustment of the pocket in order to place new shaped breast implants
 3. Breast lift or mastopexy
 4. Breast reduction surgery
- Discuss breast reconstruction following breast cancer including oncoplastic surgery and breast reconstruction including tissue expanders, direct to implant reconstruction, latissimus flaps, TRAM flaps, microsurgical SIEA and DIEP Flaps, and nipple reconstruction.
- Assess current trends and techniques in fat grafting to the breast, use of acellular dermal matrix and new synthetic substitutes, and the use of shaped breast implants for breast augmentation and reconstruction.
- Evaluate a variety of techniques used in aesthetic breast surgery including breast reduction, mastopexy, augmentation, and prevention and correction of complications including rippling and capsular contracture.

ACCREDITATION

The Southeastern Society of Plastic and Reconstructive Surgeons is accredited by the Accreditation Council for Continuing Medical Education in order to provide continuing medical education for physicians.

The Southeastern Society of Plastic and Reconstructive Surgeons designates this educational activity for a **MAXIMUM OF 18.5 CATEGORY 1 CREDITS** toward the AMA Physician's Recognition Award. Each physician should claim only those credits that he/she actually spent in the activity.

Of the 18.5 credits, 3.10 have been identified as applicable to patient safety. ▲

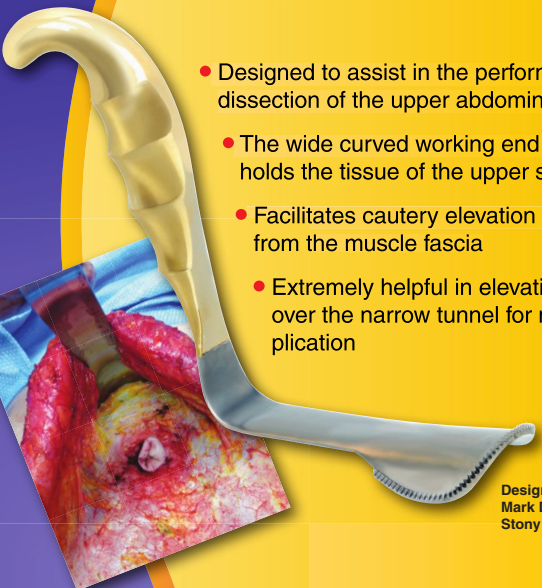

DISCLOSURE POLICY

As a provider accredited by the ACCME, SESPRS must ensure balance, independence, objectivity and scientific rigor in all its individually sponsored or jointly sponsored educational activities. Presenters are required to disclose all relevant financial relationships with commercial interests, and these disclosures will be announced to the audience verbally and via slides. If a speaker fails to make a disclosure, that speaker is precluded from making a presentation at the meeting. Additionally, if any unapproved or off-label use of a product is to be referenced in a CME program presentation, the faculty member/participant is required to disclose that the product is either investigational or it is not labeled for the usage being discussed. SESPRS shall convey any information disclosed by the faculty member/participant to the CME program audience prior to the activity.

COMMERCIAL SUPPORT DISCLOSURE

SESPRS has requested commercial support from more than one company. Commercial supporters acknowledge that the Accredited Provider (SESPRS) will make all decisions regarding the disposition and disbursement of commercial support and that the funding received from each company will in no way affect; the identification of CME needs, determination of educational objectives, selection and presentation of content, selection of all persons and organizations that will be in a position to control the content of the CME, selection of educational methods, or evaluation of the activity. Per the ACCME Standards for Commercial Support, the SESPRS will ensure that no commercial support will be used to pay for travel, honoraria, or personal expenses for non-teacher or non-author participants associated with the CME activity. The SESPRS will, as requested, provide documentation detailing the receipt and expenditure of the commercial support. Commercial supporters also agree that no other support of any type, whether financial, travel, speaker's bureau funding will be provided to a particular faculty member relating to the meeting. The SESPRS will acknowledge all commercial supporters in conference materials in conjunction with the meeting, and in other ways as applicable according to the guidelines of our program.

EPSTEIN ABDOMINOPLASTY RETRACTOR

- 
- Designed to assist in the performance of the dissection of the upper abdominal tunnel
 - The wide curved working end spreads and holds the tissue of the upper skin flap apart
 - Facilitates cautery elevation of the skin flap from the muscle fascia
 - Extremely helpful in elevating the skin flap over the narrow tunnel for muscle fascia plication
