Who We Are

Established in 1989, SETAC UK is one of several regional branches of SETAC Europe, working to address the needs of SETAC members at the local level. We aim for tripartite representation in our governance and activities, engaging members from across the UK from academia, business and government. Our activities are developed and coordinated by members of the SETAC UK Council and SETAC UK Student Council.

What We Do

We plan and coordinate UK-based activities, aiming to:

- Create a scientific forum for environmental toxicologists and chemists in the UK
- Promote multidisciplinary research into environmental problems
- Encourage the application and development of fundamental research to applied problem-solving in the environment
- During 2020, the SETAC UK and The Royal Society of Chemistry (RSC) are holding a joint meeting #EnvChem2020. The meeting takes place on the 9th and 10th July at the University of York, UK.

How Do We Do It?

The Council has face-to-face meetings at least once a year and organises quarterly teleconferences. Smaller working groups focus on developing our initiatives throughout the year. The Student Council also has regular teleconferences and is represented at Council meetings by the Student Council President.

Come and Join Us

Membership of either Council does not require a large time investment to perform the duties. Typically, teleconferences span one to two hours, followed by a similar time commitment of a couple of hours per month. #EnvChem2020

Chemistry of the Whole Environment Research

A two-day meeting organised by the Environmental Chemistry Group of the Royal Society of Chemistry and the UK Branch of the Society of Environmental Toxicology and Chemistry on the 9th and 10th July 2020 at the University of York, UK.

#EnvChem2020 provides a forum for early career and established researchers, working in environmental chemistry and ecotoxicology to share their latest research findings.

Themes:

- Environmental Processes in Soil, Water and Air
- Emerging Contaminants
- Novel techniques
- Atmospheric Chemistry
- Ecotoxicology

Key dates

Abstract submission deadline: 01/04/2020
Early bird registration deadline: 01/05/2020
Standard registration deadline: 18/06/2020

Registration fees (inc. conference dinner)
