

SETAC is committed to excellence in the environmental sciences.

The mission of the Society is to support the development of principles and practices for protection, enhancement and management of sustainable environmental quality and ecosystem integrity. The SETAC Global Partners Program – the premier level of SETAC support – is designed to accomplish this mission. By becoming a SETAC Global Partner or Affiliate, your organization will ensure that “Environmental Quality Through Science®” is more than just a shared goal, it’s a reality.

SETAC Global Initiatives

Global Partners help support the Society’s activities in the following areas:

- SETAC Developing Country Fund
- SETAC International Programs Committee activities
- SETAC publications
- SETAC training courses and workshops
- Student activities including student travel grants, sponsored memberships and registrations for meetings, workshops, training

Global Partner funds are allocated appropriately at the discretion of the SETAC World Council.

About the Society

The Society of Environmental Toxicology and Chemistry (SETAC) is a not-for-profit, global professional organization comprised of some 5,400 individual members and institutions dedicated to the study, analysis and solution of environmental problems, the management and regulation of natural resources, research and development, and environmental education.

Since 1979, the Society has provided a forum where scientists, managers and other professionals exchange information and ideas. SETAC’s founding principles are:

- Multidisciplinary approaches to solving environmental problems
- Tripartite balance among academia, business and government
- Science-based objectivity

Tripartite in Science, Dialogue and Governance

SETAC’s tripartite character is the Society’s principal calling card, providing a quality forum on environmental issues for communication and interaction among professionals on a multi-sector, interdisciplinary and multinational basis. This tripartite aspect—relying on a fundamental balance of scientific participation among government, academia and business—adds unique strengths in governance and in objectivity to SETAC meetings, workshops, advisory groups and publications.
