

UPCOMING SETAC EVENTS

Multidisciplinary Meetings

SETAC Africa 9th Biennial Conference

6–8 May 2019, Cape Town, South Africa

Development and Resilience Through Environmental Science

Fundraising goal: \$15,000

Amount raised to date: \$5,000

SETAC Europe 29th Annual Meeting

26–30 May 2019, Messukeskus Helsinki, Expo and Convention Centre, Helsinki, Finland

One Environment. One Health. Sustainable Societies.

Fundraising goal: €75,000

Amount raised to date: €27,000

SETAC Latin America 13th Biennial Meeting

15–18 September 2019, Cartagena, Colombia

Industry, Academia and Government for Global Sustainability

SETAC North America 40th Annual Meeting

3–7 November 2019, Toronto, Canada

Great Together: Separate Challenges and Collective Solutions

SETAC Europe 30th Annual Meeting

3–7 May 2020, Dublin, Ireland

SETAC 8th World Congress

6–10 September 2020, Singapore

Global Visions for Sustainable Environmental Quality

SETAC North America 41st Annual Meeting

15–19 November 2020, Fort Worth, Texas, USA

Version: March 2019

Workshops, Symposiums, and Focused Topic Meetings

SETAC Pellston Workshop®: Omics

To be announced, South Korea

The objective of the workshop is to define a roadmap for how -omics (e.g., genomics, transcriptomics, metabolomics, etc.) data can be used in the regulatory arena to improve human and ecological protection. The goals of the workshop are to increase capacity to interpret -omics data and to develop a standardized strategy for their integration with other in silico, in vitro and in vivo data into risk-based decision-making, toxicity testing, environmental monitoring and environmental quality criteria development.

Fundraising goal: \$135,000

Amount committed to date: \$87,000

SETAC Latin America Focused Topic Meeting: Fundão Dam Science Meeting

26–27 June 2019, Brasília, Brazil

The objective of this meeting is to bring together researchers, consultants, company and foundation employees as well as regulators and other interested government and community stakeholders to discuss topics of relevance for understanding the nature of the environmental impacts of and ecosystem recovery from the incident, provide participants access to current methodologies and techniques, inform them about current trends in various areas of ecotoxicology, present the state of the art of international and regional policies directly related to the theme and focus on specific technical needs for the improvement of control strategies and environmental monitoring.

SETAC North America Focus Topic Meeting: Estimating Environmental Risk from Per- and Polyfluoroalkyl Substances (PFAS)

12–15 August 2019, Durham, North Carolina, USA

The purpose of the meeting and breakout sessions planned is to review information on PFAS chemistry, exposure potential, and human and ecological toxicity, and 2) to formulate a roadmap to developing a risk assessment approach that considers mechanistic approaches for extrapolating exposure and effects across different scenarios/species and compounds within environmental pathways of exposure.

Fundraising goal: \$80,000

Amount committed to date: \$16,000

SETAC Europe Special Science Symposium: Relation between Pesticides and Soil Biodiversity and Ecosystem Function

19–20 November 2019, Brussels, Belgium

Fundraising goal: \$4,000

Version: March 2019

SETAC North America Focus Topic Meeting: Non-Target Analysis for Comprehensive Environmental Assessment

Summer 2020, Durham, North Carolina, USA

The goal of the meeting is to obtain different perspectives and better ideas on how to move non-target screening and its application forward in context of environmental analysis, monitoring, risk assessment, and management.

Fundraising goal: \$60,000

Amount committed to date: \$6,000

Sponsorship opportunities are available at all levels for these events. Please contact Barbara.Koelman@setac.org for events in Europe, Middle-East and Russia. For events in Africa, Latin America and North America, please contact Linda.Fenner@setac.org.
