

# INTEREST GROUP Science and Risk Communication

SCIRIC

## Mission

We seek to become one of the major sources of advice on science and risk communication within SETAC and beyond.

What type of support would enable you to expand or start on incorporating science outreach and communication as part of your career?

Risposte: 72 Saltate: 16

## Current Projects

Joining SCIRIC means you can become involved in the following three activities and many more:

- Survey "Scientist's role in policy and decision-making"
- Survey "Outreach and communication activities conducted by SETAC members"
- Development of training concepts and short courses for SETAC AMs
- Creation of a communication competence network within SETAC

Join SCIRIC and become an ambassador within SETAC for the necessity of sophisticated science and risk communication.

Join Us!
