

INTEREST GROUP

Pharmaceuticals Interest Group (PhIG)

Mission

- Advance the science and understanding of pharmaceuticals in all environmental compartments, and in fields such as transport, fate, exposure, effects, and impact analysis
- Serve as a scientific resource to all stakeholders impacted by the topic of pharmaceuticals in the environment
- Provide a neutral platform and focal point for collaborative identification, evaluation, and resolution of scientific issues
- Encourage the worldwide incorporation of the best available science and strategic approaches to pharmaceuticals in the environment

Membership

- Membership is open to both SETAC members and non-members.
- We aspire to maintain a membership equally balanced between academia, government, industry and the not-for-profit sector.

ENVIRONMENTAL TOXICOLOGY AND CHEMISTRY
A MONTHLY PUBLICATION OF THE SOCIETY OF ENVIRONMENTAL TOXICOLOGY AND CHEMISTRY

Call for Papers

SPECIAL ISSUE

PHARMACEUTICALS IN THE ENVIRONMENT: ADVANCES IN EXPOSURE, HAZARD AND RISK ASSESSMENT

**ACCEPTING SUBMISSIONS NOW -
UNTIL SEPTEMBER 15, 2020**
ONLINE CITABLE 48 h AFTER ACCEPTANCE
ISSUE PUBLISHED SPRING 2021

ET&C HIGHLIGHTS

- 3.421 Impact Factor
- Online Citable in 48 hours
- Double Blind Peer Review
- Social Media Promotion

MANUSCRIPT OPTIONS:

Focus Articles (6600 words) Intended to sharpen our understanding of current and emerging topics of interest to the scientific community at large. Focus Articles should be written in a succinct, magazine style.

Critical Perspectives (10 000 words) Personal reviews assessing a controversial topic of interest in environmental toxicology and chemistry.

Critical Reviews (10 000 words) Assess areas of environmental science and technology research literature of current importance in the field. Submissions should increase readers' knowledge through perceptive comparisons, thorough literature coverage, and a clear identification of research needs.

Original Articles (8000 words) must report research on topics of scientific significance and environmental importance showing new experimental data, new interpretations of existing data, or new theoretical analyses of environmental phenomena.

Short Communications (4400 words) should present concise statements representing either a preliminary report or a complete accounting of a significant research contribution.
