SRNT University is a collection of organized, curated training, scientific articles, and tools and resources for people working on nicotine and tobacco research and related professions.

TelASK, Inc.
Tel: +1-613-688-4991
Email: info@telask.com
Website: www.telask.com

TelASK is a cloud-based service that tracks the progress of tobacco users in cessation programs. TelASK engages tobacco users with automated voice calls, emails and texts. Reports can be generated, and the progress of all tobacco users viewed via a secure web portal. TelASK is currently supporting several NIH and NCI funded research grants in the U.S. and has participated in dozens of published trials. TelASK is an expert data manager and has a post doctorate data scientist on staff. If you have a research project in mind let’s start a conversation.
