MESSAGE FROM THE PROGRAM CHAIR

Dear Colleagues,

On behalf of the SRNT Program Co-Chairs and Program Committee, we are excited for the upcoming 27th Annual Meeting of the Society for Research on Nicotine and Tobacco! This year’s completely virtual meeting will be unlike any previous conference, but the SRNT Program Co-Chairs, staff, and leadership have been working hard to provide the most meaningful and interactive conference experience we can...all from the comfort of your home or office. As always, the Annual Meeting offers you cutting-edge scientific presentations across the full spectrum of basic and applied research on nicotine and tobacco and this year will be no exception. We have worked thoughtfully to create a timely and high-quality scientific program spanning the breadth of the nicotine and tobacco research field.

It is an understatement to say that 2020 was a challenging year. The COVID-19 global pandemic caused major disruptions in how we live, work, parent, and interact with others. The horrifying deaths of Black men and women like George Floyd, Breonna Taylor, and scores of other people of color this past summer elicited outrage, frustration, and helplessness on a global scale and highlighted the need for every aspect of society to prioritize eliminating inequity based on racial or ethnic identity. Given these events and the well-known tobacco-related health disparities that exist, the Program Co-Chairs and SRNT leadership agreed that this year’s conference should be focused on issues of social justice, health inequality, and most importantly, action to correct health disparities in nicotine and tobacco science. A major goal of this year’s conference is to promote and encourage action to reduce disparities in nicotine and tobacco science.

This overarching conference theme guided our selection of plenary sessions and, as always, we have aimed to include diverse content in the program from basic science, epidemiological surveys, clinical studies, and policy to better address the effects of nicotine and tobacco use at the individual and societal level. There will be presentations on discrimination’s role in smoking outcomes, pivotal clinical trials, new electronic nicotine delivery systems, effective mobile strategies for treatment and engagement, culturally tailored treatment work, insights from basic science on the effects of nicotine, plus timely topics in the areas of COVID-19 and smoking, nicotine reduction, cannabis and other substance co-use, tobacco use epidemiology, genomics, biomarkers, non-cigarette tobacco products, tobacco product regulation, cessation, and tobacco control policy.

Several key highlights for the meeting are:

**Wednesday, February 24, 2021**
4:00 p.m. – 6:00 p.m. EST

**Presidential Symposium**

**Celebrating Interventions That Reduce Tobacco-Related Inequalities: Where Do We Go From Here?**

**Chairs:** Suchitra Krishnan-Sarin, PhD, SRNT President 2020-2021, Professor of Psychiatry, Yale University, New Haven, CT, USA; Erin McClure, PhD, SRNT Program Chair 2021, Associate Professor of Psychiatry and Behavioral Sciences, Medical University of South Carolina, Charleston SC, USA
Speakers: Monica Webb-Hooper, PhD, Deputy Director National Institute on Minority Health and Health Disparities, Bethesda, MD; Valerie Yerger, ND, Professor in Health Policy, University of California, San Francisco, San Francisco, CA, USA; Lourdes Baezconde-Garbanati, PhD, MPH, Associate Dean for Community Initiatives, KSOM; Associate Director for Community Engagement, USC Norris Comprehensive Cancer Center; Director, Center for Health Equity in the Americas; Professor in Preventive Medicine, University of Southern California, CA, USA; Andrew Waa, PhD, Senior Research Fellow Department of Public Health, University of Otago, Wellington, Wellington, New Zealand; Megan Piper, PhD, Associate Professor, University of Wisconsin Department of Medicine, Madison, WI, USA; Patricia Nez Henderson, MD, MPH, Vice President, Black Hills Center for American Indian Health.

Also, not to be missed:

• The Health Disparities Network Pre-Conference Workshop titled, “RACIAL EQUITY AND SOCIAL JUSTICE: AN OPEN CONVERSATION ABOUT THE PAST, PRESENT, AND FUTURE”, on Wednesday, February 17th, from 1:30 p.m. – 4:30 p.m. EST. This featured pre-conference workshop will be free to those registered for the SRNT meeting.

• The Awards Ceremony on Friday, February 26th, from 11:30 a.m. – 1:00 p.m. EST, with special recognition of the 2020 John Slade Award Winner, Dr. Ron Borland; the 2021 John Slade Award Winner, Dr. Patricia Nez Henderson; 2021 Jarvik Russell Award Winner, Dr. Gillian Gould; and 2021 Langley Award Winner, Dr. Marina Picciotto.

• The SRNT Members Meeting on Wednesday, February 17th, from 11:00 a.m. – 12:00 p.m. EST and again from 5:00 p.m. – 6:00 p.m. EST. The first time slot includes SRNT and SRNT Europe members, while the second includes SRNT and SRNT Oceania members.

We encourage your participation and attendance in our first-ever completely virtual Annual Meeting! The SRNT Program Co-Chairs are proud of the content we have put together for this meeting and are excited about the possibilities the virtual platform allows. Please note that sessions will be a mix of live and on-demand, with meeting content available for several additional months. We expect that the virtual format will also allow for more participation from trainees and international colleagues, who may not otherwise be able to travel to the US for the meeting. We hope that your SRNT virtual experience will be as meaningful and beneficial as our in-person meeting and we hope to see everyone live and in-person in 2022!

Kind Regards,
Erin McClure, PhD

EDUCATIONAL OBJECTIVES

• Promote and encourage action to reduce disparities in nicotine and tobacco science.
• Address nicotine and tobacco’s role in the changing health care environment.
• Describe new research and clinical data on the effects of nicotine and tobacco.
• Discuss recent advances in nicotine and tobacco research, including tobacco regulatory science.
• Highlight international research on tobacco control.
• Through scientific exchange, integrate current research with implications for clinical practice.
• Address clinical and public health implications of concurrent use of tobacco with other psychoactive substances and drugs.

TARGET AUDIENCE

The 27th Annual Meeting of SRNT is geared toward individuals involved in the research of nicotine and tobacco. This includes basic, clinical, policy, and public health scientists from academia, government, and industry.

Please note: Symposia that take place in advance of the meeting, after the meeting’s conclusion, or during evening hours are not part of the SRNT Official Program unless specifically noted. The Program Committee has not reviewed the scientific content of Satellite Symposia. Satellite Symposia presenters are responsible for providing disclosures during their session.

MEMBERS MEETING

The SRNT will hold its Members Meeting on Wednesday, February 17th, from 11:00 a.m. – 12:00 p.m. EST and again from 5:00 p.m. – 6:00 p.m. EST. The first time slot includes SRNT and SRNT Europe members, while the second includes SRNT and SRNT Oceania members.

All SRNT members are encouraged to attend. For more details please feel free to email: membership@srnt.org.

REMEMBRANCES OF PIONEERS FOR WHOM SRNT’S 2021 AWARDS ARE NAMED

Don’t miss the SRNT 2021 Awards Ceremony located on the Main Stage of the Virtual Platform on Friday, February 26, 11:30 a.m.-1:00 p.m. ET, with special recognition from our Langley Award Winner, Dr. Marina Picciotto; two John Slade Award Winners: Dr. Ron Borland, Dr. Patricia Nez-Henderson; and Jarvik Russell New Investigator Award Winner, Dr. Gillian Gould.

THE JOHN SLADE AWARD

The John Slade Award honors individuals who have made outstanding contributions to public health and tobacco control through science-based public policy and public advocacy.

2020 Award Recipient:

Ron Borland PhD FASSA
Deputy Director, Melbourne Center for Behaviour Change,
Professor of Psychology – Health Behaviour
The University of Melbourne, Victoria, Australia

2021 Award Recipient:

Patricia Nez Henderson, MD, MPH
Vice President
Black Hills Center for American Indian Health, Rapid City, SD, USA

JOHN SLADE

Dr. John Slade was an expert on the treatment of alcohol, tobacco, and drug addiction and one of America’s pioneer advocates for tobacco control.

He was a member of the team that conducted the first scholarly analysis of previously secret documents from the Brown and Williamson Tobacco Company, which formed the basis for the film “The Insider.” John’s analysis led to a landmark series of articles in the Journal of the American Medical Association in 1995, as well as a book, “The Cigarette Papers.” His groundbreaking research
to prove that cigarettes are nicotine delivery devices helped make it possible for the Food and Drug Administration to claim regulatory authority over tobacco products under then-FDA Commissioner Dr. David Kessler.

John was appointed Professor of Medicine, Robert Wood Johnson Medical School of the UMDNJ, in 1998. He emerged as a leader in substance abuse prevention and tobacco control for the state of New Jersey through his teaching and clinical work as well as through his active involvement with the Medical Society of New Jersey and the New Jersey Public Health Association. John played a major role in helping New Jersey develop its tobacco prevention and treatment program, funded as part of the 1998 $206 billion settlement with tobacco companies.

He co-edited the first major clinical textbook on nicotine addiction and founded the Committee on Nicotine Dependence of the American Society of Addiction Medicine (ASAM).

THE JARVIK-RUSSELL NEW INVESTIGATOR AWARD

The Jarvik-Russell New Investigator Award, named after Murray Jarvik and Michael Russell, recognizes scientists early in their careers who have made extraordinary contributions to the field of nicotine and tobacco research.

2021 Award Recipient:

Gillian Gould, PhD, MA, MBChB
Associate Professor
NHMRC and CINSW Translating Research into Practice (TRIP) Fellow, School of Medicine and Public Health, The University of Newcastle, Hunter Medical Research Institute

MURRAY E. JARVIK

Dr. Murray Jarvik was born in New York City in 1923. Following medical school, Murray worked at the Yerkes Laboratory in Florida. It was here that he serendipitously witnessed a monkey that would smoke cigarettes. A Fellowship at Mount Sinai Hospital in New York followed, where Murray became one of the pre-eminent researchers studying a newly discovered substance: LSD.
LSD research pivoted Murray into the emerging field of psychopharmacology in the mid-1950s and to a professorial position at the newly created Albert Einstein School of Medicine. It was here that Murray established himself as a premier researcher on effects of drugs on learning and behavior.

Murray’s interests in the mid-1960s turned toward tobacco smoking. Although Murray continued, initially, to study the effects of other drugs and memory, he eventually shifted his focus to smoking and nicotine addiction almost entirely.

One of the first projects he attempted, spurred by the very memorable observation at Yerkes, was to attempt to get monkeys to smoke. This was partially successful and led to experiments with humans and rats so that by 1970 Murray had collected sufficient data to suggest that nicotine was key in the reinforcement of smoking. His work was included in subsequent Surgeon General reports on smoking and nicotine addiction.

Perhaps Murray Jarvik’s most notable achievement was work done with Jed Rose in the 1980s investigating the possibility of delivering nicotine through the skin in sufficient quantities to affect smoking behavior. At first, their approach was quite simple, a basic poultice of nicotine. After much development, they were able to patent the concept of a nicotine transdermal patch, which they turned over to UCLA. It soon made it into production as the second FDA-approved pharmacologic treatment for smoking cessation after nicotine gum. With both established efficacy and ease of use, it was highly successful, for several years among the top three most profitable patents for the University of California.

MICHAEL RUSSELL

By the 1960s, the emerging evidence of the danger of cigarette smoking was clear, but there was very little understanding of why people smoked. Cigarette smoking was generally thought of as a habit, with pharmacological factors receiving little or no attention.

Michael Russell was the man who did most to revolutionize our understanding. His research led to the 1988 report of the US Surgeon General, Nicotine Addiction, which finally brought recognition that cigarette smoking is a classic drug dependence.

Russell was a psychiatrist in training at the Maudsley Hospital, in south London, when he chose the topic of cigarette smoking for his research thesis in 1967. Based on his review of what was then fragmentary research literature, he concluded in a 1971 paper that the drug nicotine was the motivating force underlying smoking behavior. He made the study of the interacting pharmacological and psychological determinants of tobacco dependence his life’s work.

Mike is regarded by many as the father of effective treatment to help smokers quit, but he is probably best known in the cessation field for a non-pharmacological intervention. In 1979 he published a trial examining the effectiveness of brief advice to quit smoking given by GPs in the course of routine consultations. The one-year success rate was 5%, compared with less than 1% in controls. A successful trial of nicotine chewing gum combined with brief advice in primary care followed. Mike Russell moved toward the concept of an integrated district smoking cessation service, in which
routine delivery of advice and pharmacological therapy in primary care was combined with intensive clinic support. That vision has now been realized in Great Britain’s National Health Service.

**LANGLEY AWARD FOR BASIC RESEARCH ON NICOTINE AND TOBACCO**
The Langley Award honors scientists who have made groundbreaking advances in basic nicotine research in the area of pharmacology, neuroscience and/or genetics.

**JOHN NEWTON LANGLEY**

Born in 1852, the son of a private schoolmaster, John Newton Langley was first educated at home and then at Exeter Grammar School before he entered St John’s College, Cambridge, in October 1871. With the aim of qualifying for a career in the Civil Service, he initially studied mathematics, history and other literary subjects, but changed his plans in his second year and began to read natural sciences. Langley was especially attracted by the classes in elementary biology, embryology and physiology, which were held at Trinity College. Langley’s first study was concerned with the physiological effects of the drug jaborandi (containing pilocarpine), which he examined in the frog, dog, rat and rabbit, noting in particular its decelerating effect on the heart rate and a similarity of its action with that of the alkaloid physostigmine.

From the late 1880s Langley became interested in the structure and function of the vegetative or “involuntary” nervous system. His research explored the hypothesis that not only the heart but all involuntary muscles were innervated by two different, antagonistic types of visceral nerve fibers. By 1886 he had distinguished morphologically the visceral (vegetative) fibers stemming from the thoracic part of the spinal cord (i.e. the sympathetic system) from the fibers that originated from its ercervico-cranial and sacral regions (i.e. the parasympathetic system).

Langley’s classic research, performed in the early 1900s, described the effects of nicotine at neuromuscular and autonomic ganglionic sites. This research led directly to theories about the chemical mediation of neuronal transmission and the concept of neuronal receptors. Thus, Langley’s early research contributed to basic findings on the functioning of the nervous systems as well as to understanding of the biological basis of tobacco dependence.
Langley died on 5 November 1925, after very brief illness. At the end of his life he held honorary degrees from the universities of Dublin, St. Andrews, Groningen, and Strasbourg.

### 2021 SRNT SPONSORS & EXHIBITORS

Plan time in your schedule to visit the 3-D Virtual Exhibit Hall with the SRNT sponsors and exhibitors. Thanks to all the companies virtually exhibiting this year. SRNT appreciates their financial support!

**Virtual Exhibit Hours:**

- **Thursday, February 25, 2021**: 10:30 a.m.-4:30 p.m. ET
- **Friday, February 26, 2021**: 9:00 a.m.-3:00 p.m. ET
- **Saturday, February 27, 2021**: 9:30 a.m.-2:00 p.m. ET

### 2021 SRNT SUPPORTERS

SRNT would like to thank Westat for their financial support of the 2021 Annual Meeting and SRNT’s mission to *stimulate the generation and dissemination of new knowledge concerning nicotine in all its manifestations, from cellular to societal.*
ePoster sessions have specific times designated for the authors to be present to discuss their posters virtually with attendees in the ePoster Gallery and/or their own designated video conferencing link. The on-demand, ePoster Gallery will be available for attendee viewing starting on Wednesday, February 17, 2021 located in the SRNT Virtual Platform. Presentations will be available to paid registrants through 2021.

ePoster presentations are as follows:

**WEDNESDAY, FEBRUARY 24, 2021**

- Pre-Clinical: 9:30 a.m.-10:30 a.m. ET
- Rapids: 10:00 a.m.-11:00 a.m. ET
- Clinical: 10:30 a.m.-11:30 a.m. ET
- Public Health: 11:30 a.m.-12:30 p.m. ET
- Policy: 12:30 p.m.-1:30 p.m. ET

**EVALUATION**

Thank you again for attending the meeting! We hope you enjoy the sessions and the virtual platform. An overall program evaluation will be emailed to all Annual Meeting participants following the conference. Your feedback is greatly appreciated!
