

## American Board of Fluency and Fluency Disorders

### FLUENCY PORTFOLIO CASE PRESENTATION

<input type="checkbox"/> <b>Preschool Case</b> <input type="checkbox"/> <b>School-age Case</b> <input type="checkbox"/> <b>Adolescent-Adult Case</b>	<b>Case Initials:</b> <b>Age at initial contact:</b>
<b>Date of First Contact with Case:</b>	<b>Date of Initial Evaluation:</b>
<b>Number of Total Therapy Sessions</b> <i>(at time of portfolio submission):</i>	<b>Current Status of Case:</b> <input type="checkbox"/> <b>Dismissed from Therapy</b> <input type="checkbox"/> <b>Phasing out of Therapy</b> <input type="checkbox"/> <b>Continuing in Therapy</b>

- 1.** Present a detailed history of the client's problem. Present additional information obtained from the client and/or guardians at the time of the initial evaluation, including the methods for obtaining this information. State the rationale for obtaining this information along with the reasons for completing an evaluation and/or re-evaluation of this client.
- 2.** Present the results of the initial evaluation (and your re-evaluation, if applicable). Please specify the formal and informal assessment methods used along with the results of each assessment tool administered (see format below). Explain your rationale for selection of the assessment tools that you used in your evaluation/re-evaluation.

<b>Informal-Formal Measures</b>	<b>Why were these measures (informal or formal) selected?</b> <i>(Provide reference to literature for measures selected)</i>

3. State the results of the evaluation (and re-evaluation, if appropriate) measures.
4. State the client's diagnosis based on the evaluation results. Detail the relevant contributing factors that were noted, explaining how these factors were used in planning treatment for this case. *(Provide at least two references to the literature.)*
5. Complete the chart below: Specify the treatment goals for this case, providing a rationale for each based on relevant stakeholder perspectives, research and clinical expertise. Specify how outcomes will be measured across treatment for each goal. Explain the treatment approach chosen or what elements of various treatment approaches were chosen to treat this case. Give a rationale for the approach(es).

<b>Treatment Goals &amp; Outcome Measurements:</b>	<b>Rationale for each treatment goal</b> <i>(reference literature)</i>
<b>Treatment Approach or Elements of various approaches selected:</b>	<b>Provide rationale</b> <i>(reference to literature)</i>

## **B. Report of Client Progress Toward Goals Across Treatment**

Provide a summary of your treatment with this client at three intervals across the treatment period:

### **Summary 1**

Date of Summary:

Number of therapy sessions within this summary period:

Summary:

Describe the client's response to therapy at this point in time. Describe modifications to treatment based upon the client's responses and/or others involved in treatment. Explain your rationale for any modifications to treatment. Describe how relevant others were involved in the therapy process, if applicable.

## **Summary 2**

Date of Summary:

Number of therapy sessions within this summary period:

Summary:

Describe the client's response to therapy at this point in time. Describe modifications to treatment based upon the client's responses and/or others involved in treatment. Explain your rationale for any modifications to treatment. Describe how relevant others were involved in the therapy process, if applicable.

## **Summary 3**

Date of Summary:

Number of therapy sessions within this summary period:

Summary:

Describe the client's response to therapy at this point in time. Describe modifications to treatment based upon the client's responses and/or others involved in treatment. Explain your rationale for any modifications to treatment. Describe how relevant others were involved in the therapy process, if applicable.

## **C. Video Examples of Case**

Provide **2 videotape** examples of **5-7 minutes in length** each related to this case at some point during the therapy process. In addition, answer the questions below for each video clip. The purpose of these clips is for the reviewers of your portfolio to observe your ability to engage in the *therapeutic process*, responding to the needs of the client at a particular moment in time.

***Important points to remember:***

- ✓ ***The front of the client's face is visible on the video recording.***
- ✓ ***You are visible on the video recording.***

### **Video Clip #1**

Provide a written summary answering the following questions related to this video clip, labeled to match the video clip title:

- 1) At what point in the therapy process was this video clip taken?
- 2) What do you observe about your clinical skills in this video clip?
- 3) What do you observe about the client in this video clip?
- 4) What aspects of the therapeutic process are going well during this clip?
- 5) Why did you select this video clip?
- 6) After reviewing this clip, is there anything you would do differently as the clinician?

## **Video Clip #2**

Provide a written summary answering the following questions related to this video clip, labeled to match the video clip title:

- 7) At what point in the therapy process was this video clip taken?
- 8) What do you observe about your clinical and interaction skills in this video clip?
- 9) What do you observe about the client in this video clip?
- 10) What aspects of the therapeutic process are going well during this clip?
- 11) Why did you select this video clip?
- 12)** After reviewing this clip, is there anything you would do differently as the clinician?

## **Concluding Remarks of Portfolio Case**

**Include the following information:**

- 1) Explain why this case was chosen to represent your clinical abilities within this population.
- 2) Explain what you learned from this case.
- 3) Based upon treating this case, explain how you plan to continue your clinical growth with this population.
